

Table of contents

- **Chapter 1 Introduction**
- **Chapter 2 Theoretical Foundation And Background Material: Modeling of Dynamical Systems**
- **Chapter 3 Theoretical Foundation And Background Material: Complex Variables, Differential Equations, Laplace Transform**
- **Chapter 4 Theoretical Foundation and Background Material: Block Diagrams, Signal Flow Graphs and State Diagrams**
- **Chapter 5 Modeling of Physical Systems: Mixed Systems**
- **Chapter 6 Stability of Linear Control Systems**
- **Chapter 7 Time-Domain Analysis of Control Systems**
- **Chapter 8 Root Locus Techniques**
- **Chapter 9 Frequency Response**
- **Chapter 10 Design of Control Systems: Time and Frequency Domain**
- **Chapter 11 The Control Laboratory: Physical Labs**
- **Chapter 12 State Variable Analysis**
- **Chapter 13 Design of Control Systems: State Feedback Approach**
