- **Foreword**
- **Preface**
- **Part I Systems: Advances in Systems Science and Thinking**
- **1 Systems Philosophy**
- **2 Advances in Systems Science**
- **3 Advances in Systems Thinking**
- **4 Systems Engineering Philosophy**
- **5 System Models**
- **Case A Japanese Lean Volume Supply Systems**
- **Part II Systems Methodology**
- **6 Overview of the Systems Methodology**
- **7 SM1: Addressing Complex Issues and Problems**
- **Case B The Practice Intervention**
- **8 SM2: Exploring the Solution Space**
- **9 SM3 and 4: Focusing Solution System Purpose**
- **Case C The Total Weapon System Concept**
- **10 SM5: Architecting/Designing System Solutions**
- **11 SM6: Optimize Solution System Design**
- **12 SM7: Create and Prove Solution System (SOS**
- **13 The Systems Methodology - Elaborated**
- **14 Setting the Systems Methodology to Work**
- **Case D Architecting a Defense Capability**
- **Part III Systems Methodology and Systems Engineering**
- **15 Systems Engineering - The Real Deal**
- **16 Systems Creation: Hand of Purpose, Root of Emergence**
- **Case E The police Command and Control System**
- **Case F Fighter Avionics System Design**
- **17 SOS Engineering Principles and Practices**
- **Case G Defense Procurement in the 21st Century**
- **18 Systems Engineering: Intelligent Systems**
- **Case H Global Warming, Climate Change and Energy**
- **References**
- **Index**
