

Table of Contents

- Preface
- Chapter 0 The Subject of Transport Phenomena
- Part I Momentum Transport
- Chapter 1 Viscosity and the Mechanisms of Momentum Transport
- Chapter 2 Shell Momentum Balances and Velocity Distribution in Laminar Flow
- Chapter 3 The Equations of Change for Isothermal Systems
- Chapter 4 Velocity Distributions with More Than One Independent Variable
- Chapter 5 Velocity Distributions in Turbulent Flow
- Part II Energy Transport
- Chapter 6 Interphase Transport in Isothermal Systems
- Chapter 7 Macroscopic Balances for Isothermal Flow Systems
- Chapter 8 Polymeric Liquids
- Chapter 9 Thermal Conductivity and the Mechanisms of Energy Transport
- Chapter 10 Shell Energy Balance and Temperature Distributions in Solids and Laminar Flow
- Chapter 11 The Equations of Change for Nonisothermal Systems
- Chapter 12 Temperature Distributions with More than One Independent Variable
- Chapter 13 Temperature Distributions in Turbulent Flow
- Chapter 14 Interphase Transport in Nonisothermal Systems
- Chapter 15 Macroscopic Balances for Nonisothermal Systems
- Chapter 16 Energy Transport by Radiation
- Part III Mass Transport
- Chapter 17 Diffusivity and the Mechanisms of Mass Transport
- Chapter 18 Concentration Distributions in Solids and Laminar Flow
- Chapter 19 Equations of Change for Multicomponent Systems
- Chapter 22 Interphase Transport in Nonisothermal Mixtures
- Chapter 20 Concentration Distributions with More than One Independent Variable
- Chapter 21 Concentration Distributions in Turbulent Flow
- Chapter 23 Macroscopic Balances for Multicomponent Systems
- Chapter 24 Other Mechanisms for Mass Transport
- Appendix A A Vector and Tensor Notation
- Appendix B Fluxes and the Equations of Change
- Appendix C Mathematical Topics
- Appendix D The Kinetic Theory of Gases
- Appendix E Tables for Prediction of Transport Properties
- Appendix F Constants and Conversion Factors
- Notation
- Author Index
- Subject Index
- About the Authors
