

- **Part 1 Introduction**
- **Understanding Structural Diagrams of Organic Molecules**
- **Some Common Molecules**
- **Proteins and Three-Dimensional Protein Structure**
- **Some of the Protein Structures That Appear in This Book**
- **Part 2 Inflammatory, Cardiovascular and Metabolic Diseases**
- **Anti-Inflammatory Agents**
- **Acetylsalicylic acid (Aspirin)**
- **Naproxen (Aleve)**
- **How Do Anti-Inflammatory Drugs Work?**
- **Other Eicosanoids in Inflammation**
- **An Overview of Inflammation**
- **Celecoxib (Celebrex)**
- **Antiasthmatic and Antiallergic Agents**
- **Prednisone (Deltasone)**
- **Methotrexate (Trexall)**
- **Allopurinol (Zyloprim)**
- **Salmeterol (Serevent)**
- **Fluticasone Propionate (Flovent)**
- **Montelukast Sodium (Singulair)**
- **Tiotropium Bromide (Spiriva)**
- **Loratadine (Claritin)**
- **Type 2 Diabetes**
- **An Overview of Metabolic Syndrome**
- **Antidiabetic and Cholesterol-Lowering Agents**
- **Metformin (Glucophage)**
- **Glipizide (Glucotrol)**
- **Pioglitazone (Actos)**
- **Sitagliptin (Januvia)**
- **Atorvastatin (Lipitor)**
- **Ezetimibe (Zetia)**
- **Cardiovascular Agents**
- **Atenolol (Tenormin)**
- **Enalapril (Vasotec)**
- **Candesartan Cilexetil (Atacand)**
- **Aliskiren (Tekturna)**
- **Amlodipine (Norvasc)**
- **Nitroglycerin**
- **Clopidogrel Bisulfate (Plavix)**
- **Digoxin (Lanoxin)**
- **Receptors and Signaling**
- **Part 3 Reproductive Medicine**
- **Information Flow into the Cell by Chemical Signaling**
- **References for**
- **Part 2**
- **Oral Contraceptives**

- **Testosterone**
- **Mifepristone (Mifeprex)**
- **Oxytocin (Oxytocin)**
- **Some Aspects of Osteoporosis**
- **Alendronate (Fosamax)**
- **Calcitriol (Rocaltrol)**
- **Raloxifene (Evista)**
- **Teriparatide (Forteo)**
- **Glaucoma and Antiulcer Agents**
- **Latanoprost (Xalatan)**
- **Ranitidine (Zantac)**
- **Omeprazole (Prilosec)**
- **References for**
- **Part 3**
- **Part 4 Autoimmune Disease and Organ Transplant**
- **A Brief Survey of the Immune System**
- **Azathioprine (Imuran)**
- **Sildenafil (Viagra)**
- **Osteoporosis**
- **Immunosuppressive Agents**
- **Mycophenolate Mofetil (CellCept)**
- **Cyclosporin (Neoral)**
- **Tacrolimus (Prograf)**
- **FTY720 (Fingolimod)**
- **Infectious Diseases**
- **Antibiotics**
- **Amoxicillin (Amoxil)**
- **Cefaclor (Ceclor)**
- **Doxycycline (Vibramycin)**
- **Azithromycin (Zithromax)**
- **Ciprofloxacin (Cipro)**
- **Trimethoprim (Triprim)**
- **Amikacin (Amikin)**
- **Antiviral Agents**
- **Vancomycin (Vancocin)**
- **Linezolid (Zyvox)**
- **Isoniazid (Laniazid)**
- **Ancillary Antibiotics**
- **Drug Resistance**
- **On Viruses and Viral Diseases**
- **Acyclovir (Zovirax)**
- **Ribavirin (Virazole)**
- **Oseltamivir (Tamiflu)**
- **Zidovudine (Retrovir, AZT)**
- **Zalcitabine (Hivid)**
- **Nevirapine (Viramune)**

- **Efavirenz (Sustiva)**
- **Lopinavir + Ritonavir (Kaletra)**
- **UK427857 (Maraviroc)**
- **Antifungal Agents**
- **Amphotericin (Fungizone)**
- **Fluconazole (Diflucan)**
- **Caspofungin (Cancidas)**
- **Terbinafine (Lamisil)**
- **Antimalarial and Antiparasitic Agents**
- **Parasitic Diseases: A Focus on Malaria**
- **Chloroquine (Aralen)**
- **Artemether + Lumefantrine (CoArtem)**
- **Atovaquone + Proguanil (Malarone)**
- **Miltefosine (Impavido)**
- **Nitazoxanide (Alinia)**
- **Ivermectin (Stromectol)**
- **References for**
- **Part 4**
- **Part 5 Malignant Disease**
- **An Overview of Cancer**
- **Capecitabine (Xeloda)**
- **Carboplatin (Paraplatin)**
- **Vinblastine (Velban)**
- **Paclitaxel (Taxol)**
- **Cyclophosphamide (Cytosan)**
- **Tamoxifen (Nolvadex)**
- **Irinotecan (Camptosar)**
- **Bleomycin (Blenoxane)**
- **Imatinib (Gleevec)**
- **Sunitinib (Sutent)**
- **Bortezomib (Velcade)**
- **Ancillary Anticancer Agents**
- **References For**
- **Part 5**
- **Part 6 Drugs Acting on The Nervous System**
- **Pain And Analgesia**
- **L**
