Table of Contents

- Tables and Figures
- Preface The Authors
- Chapter 1 Introduction and Overview
- Review of Foundational Research Concepts Review of Foundational Statistical Information The Normal Distribution
- Hypothesis-Testing Process
- Chapter 3 Maximizing Hypothesis Decisions Using Power Analysis
- Balance between Avoiding Type I and Type II Errors
- Chapter 4 Research and Statistical Designs
- Formulating Experimental Conditions Reducing the Imprecision in Measurement Controlling Extraneous Experimental Influences Internal Validity and Experimental Designs
- The IBM SPSS Data View Screen Naming and Defining Variables in Variable View Entering Data Examples of Basic Analyses Examples of Modifying Data Procedures
- Research Example
- Chapter 7 Randomized Design Comparing Two Treatments and a Control Using a One-Way
- Step 1 Establish the Alternative (Research) Hypothesis (Ha) Hypothesis Testing
- Step 3 Decide on a Risk Level (Alpha) of Rejecting the True H0 Considering Type I and II Errors and Power Hypothesis Testing
- Step 4 Choose Appropriate Statistic and Its Sampling Distribution to Test the H0 Assuming H0 Is True Hypothesis Testing
- Step 5 Select Sample, Collect Data, Screen Data, Compute Statistic, and Determine Probability Estimates Hypothesis Testing
- Step 6 Make Decision Regarding the H0 and Interpret Post Hoc Effect Sizes and Confidence Intervals Formula Calculations of the Study Results
- Chapter 8 Repeated-Treatment Design Using a Repeated-Measures Analysis of Variance Research Problem Study Variables Research Design Stating the Omnibus (Comprehensive) Research Question Hypothesis Testing
- Chapter 2 Logical Steps of Conducting Quantitative Research: Hypothesis-Testing Process
- Chapter 5 Introduction to IBM SPSS p. 20
- Step 2 Establish the Null Hypothesis (H0) Hypothesis Testing
- Chapter 6 Diagnosing Study Data for Inaccuracies and Assumptions
- Analysis of Variance Research Problem Study Variables Research Design Stating the Omnibus (Comprehensive) Research Question Hypothesis Testing
- Step 1 Establish the Alternative (Research) Hypothesis (Ha) Hypothesis Testing
- Step 2 Establish the Null Hypothesis (H0) Hypothesis Testing
- Step 3 Decide on a Risk Level (Alpha) of Rejecting the True H0 Considering Type I and II Errors and Power Hypothesis Testing
- Step 4 Choose Appropriate Statistic and Its Sampling Distribution to Test the H0 Assuming H0 Is True Hypothesis Testing
- Step 5 Select Sample, Collect Data, Screen Data, Compute Statistic, and Determine Probability Estimates Hypothesis Testing

- Step 6 Make Decision Regarding the H0 and Interpret Post Hoc Effect Sizes and Confidence Intervals Formula Calculations of the Study Results
- Chapter 9 Randomized Factorial Experimental Design Using a Factorial ANOVA Research Problem Study Variables Research Design Stating the Omnibus (Comprehensive) Research Question Hypothesis Testing
- Step 1 Establish the Alternative (Research) Hypothesis (Ha) Hypothesis Testing
- Step 2 Establish the Null Hypothesis (H0) Hypothesis Testing
- Step 3 Decide on a Risk Level (Alpha) of Rejecting the True H0 Considering Type I and II Errors and Power Hypothesis Testing
- Step 4 Choose Appropriate Statistic and Its Sampling Distribution to Test the H0 Assuming H0 Is True Hypothesis Testing
- Step 5 Select Sample, Collect Data, Screen Data, Compute Statistic, and Determine Probability Estimates Hypothesis Testing
- Step 6 Make Decision Regarding the H0 and Interpret Post Hoc Effect Sizes and Confidence Intervals Formula Calculations of the Study Results
- Chapter 10 Analysis of Covariance Research Problem Study Variables Research Design Stating the Omnibus (Comprehensive) Research Question Hypothesis Testing
- Step 1 Establish the Alternative (Research) Hypothesis (Ha) Hypothesis Testing
- Step 2 Establish the Null Hypothesis (H0) Hypothesis Testing
- Step 3 Decide on a Risk Level (Alpha) of Rejecting the True H0 Considering Type I and II Errors and Power Hypothesis Testing
- Step 4 Choose Appropriate Statistic and Its Sampling Distribution to Test the H0 Assuming H0 Is True Hypothesis Testing
- Step 5 Select Sample, Collect Data, Screen Data, Compute Statistic, and Determine Probability Estimates Hypothesis Testing
- Step 6 Make Decision Regarding the H0 and Interpret Post Hoc Effect Sizes and Confidence Intervals Formula ANCOVA Calculations of the Study Results ANCOVA Study Results
- Chapter 11 Randomized Control Group and Repeated-Treatment Designs and Nonparametics Research Problem Study Variables Research Design Stating the Omnibus (Comprehensive) Research Question Hypothesis Testing
- Step 1 Establish the Alternative (Research) Hypothesis (Ha) Hypothesis Testing
- Step 2 Establish the Null Hypothesis (H0) Hypothesis Testing
- Step 3 Decide on a Risk Level (Alpha) of Rejecting the True H0 Considering Type I and II Errors and Power Hypothesis Testing
- Step 4 Choose Appropriate Statistic and Its Sampling Distribution to Test the H0 Assuming H0 Is True Hypothesis Testing
- Step 5 Select Sample, Collect Data, Screen Data, Compute Statistic, and Determine Probability Estimates Hypothesis Testing
- Step 6 Make Decision Regarding the H0 and Interpret Post Hoc Effect Sizes Nonparametric Research Problem Two: Friedman's Rank Test for Correlated Samples and Wilcoxon's Matched-Pairs Signed-Ranks Test
- Chapter 12 Bivariate and Multivariate Correlation Methods Using Multiple Regression Analysis Research Problem Study Variables Research Method Stating the Omnibus (Comprehensive) Research Question Hypothesis Testing
- Step 1 Establish the Alternative (Research) Hypothesis (Ha) Hypothesis Testing

- Step 2 Establish the Null Hypothesis (H0) Hypothesis Testing
- Step 3 Decide on a Risk Level (Alpha) of Rejecting the True H0 Considering Type I and II Errors and Power Hypothesis Testing
- Step 4 Choose Appropriate Statistic and Its Sampling Distribution to Test the H0 Assuming H0 Is True Hypothesis Testing
- Step 5 Select Sample, Collect Data, Screen Data, Compute Statistic, and Determine Probability Estimates Hand Calculations of Statistics
- Chapter 13 Understanding Quantitative Literature and Research
- Research Interpretation for Consumers Interpretation of a Quantitative Research Article
- References Index
