

Table of Contents

- Preface to the First Edition
- Preface to the Second Edition
- Preface to the Third Edition
- Preface to Third Edition Revised
- Preface to Fourth Edition
- Preface to Fifth Edition
- Acknowledgements
- Notation and Definitions
- 1 Introduction to Reliability Engineering
- What is Reliability Engineering?
- Why Teach Reliability Engineering?
- Why do Engineering Products Fail?
- Probabilistic Reliability
- Repairable and Non-repairable Items
- The Pattern of Failures with Time (Non-repairable Items)
- The Pattern of Failures with Time (Repairable Items)
- The Development of Reliability Engineering
- Courses, Conferences and Literature
- Organizations Involved in Reliability Work
- Reliability as an Effectiveness Parameter
- Reliability Programme Activities
- Reliability Economics and Management
- 2 Reliability Mathematics
- Introduction
- Variation
- Probability Concepts
- Rules of Probability
- Continuous Variation
- Continuous Distribution Functions
- Summary of Continuous Statistical Distributions
- Variation in Engineering
- Conclusions
- Discrete variation
- Statistical Confidence
- Statistical Hypothesis Testing
- Non-parametric Inferential Methods
- Goodness of Fit
- Series of Events (Point Processes)
- Computer Software for Statistics
- Practical Conclusions
- 3 Life Data Analysis and Probability Plotting
- Introduction
- Life Data Classification
- Ranking of Data

- Weibull Distribution
- Computerized Data Analysis and Probability Plotting
- Confidence Bounds for Life Data Analysis
- Choosing the Best Distribution and Assessing the Results
- 4 Monte Carlo Simulation
- Introduction
- Monte Carlo Simulation Basics
- Additional Statistical Distributions
- Sampling a Statistical Distribution
- Basic Steps for Performing a Monte Carlo Simulation
- Monte Carlo Method Summary
- 5 Load-Strength Interference
- Introduction
- Distributed Load and Strength
- Analysis of Load-Strength Interference
- Effect of Safety Margin and Loading Roughness on Reliability (Multiple Load Applications)
- Practical Aspects
- 6 Reliability Prediction and Modelling
- Introduction
- Fundamental Limitations of Reliability Prediction
- Standards Based Reliability Prediction
- Other Methods for Reliability Predictions
- Practical Aspects
- Systems Reliability Models
- Availability of Repairable Systems
- Modular Design
- Block Diagram Analysis
- Fault Tree Analysis (FTA)
- State-space Analysis (Markov Analysis)
- Petri Nets
- Reliability Apportionment
- 7 Design for Reliability
- Introduction
- Design for reliability Process
- Identify
- Design
- Analyse
- Verify
- Validate
- Control
- Assessing the DfR Capability of an Organization
- 8 Reliability of Mechanical Components and Systems
- Introduction
- Mechanical Stress, Strength and Fracture
- Fatigue

- Creep
- Wear
- Corrosion
- Vibration and Shock
- Temperature Effects
- Materials
- Components
- Processes
- 9 Electronic Systems Reliability
- Introduction
- Reliability of Electronic Components
- Component Types and Failure Mechanisms
- Summary of Device Failure Modes
- Circuit and System Aspects
- Electronic System Reliability Prediction
- Reliability in Electronic System Design
- Parameter Variation and Tolerances
- Design for Production, Test and Maintenance
- 10 Software Reliability
- Introduction
- Software in Engineering Systems
- Software Errors
- Preventing Errors
- Software Structure and Modularity
- Programming Style
- Fault Tolerance
- Redundancy/Diversity
- Languages
- Data Reliability
- Software Checking
- Software Testing
- Error Reporting
- Software Reliability Prediction and Measurement
- Hardware/Software Interfaces
- 11 Design of Experiments and Analysis of Variance
- Introduction
- Statistical Design of Experiments and Analysis of Variance
- Randomizing the Data
- Engineering Interpretation of Results
- The Taguchi Method
- 12 Reliability Testing
- Introduction
- Planning Reliability Testing
- Test Environments
- Testing for Reliability and Durability: Accelerated Test
- Test Planning

- Failure Reporting, Analysis and Corrective Action Systems (FRACAS)
- 13 Analysing Reliability Data
- Introduction
- Pareto Analysis
- Accelerated Test Data Analysis
- Acceleration Factor
- Acceleration Models
- Field-Test Relationship
- Statistical Analysis of Accelerated Test Data
- Reliability Analysis of Repairable Systems
- CUSUM Charts
- Exploratory Data Analysis and Proportional Hazards Modelling
- Field and Warranty Data Analysis
- 14 Reliability Demonstration and Growth
- Introduction
- Reliability Metrics
- Test to Success (Test Run Method)
- Test to Failure Method
- Extended Life Test
- Continuous Testing
- Degradation Analysis
- Combining Results Using Bayesian Statistics
- Non-Parametric Methods
- Reliability Demonstration Software
- Practical Aspects of Reliability Demonstration
- Standard Methods for Repairable Equipment
- Reliability Growth Monitoring
- Making Reliability Grow
- 15 Reliability in Manufacture
- Introduction
- Control of Production Variability
- Control of Human Variation
- Acceptance Sampling
- Improving the Process
- Quality Control in Electronics Production
- Stress Screening
- Production Failure Reporting Analysis and Corrective Action System (FRACAS)
- 16 Maintainability, Maintenance and Availability
- Introduction
- Availability Measures
- Maintenance Time Distributions
- Preventive Maintenance Strategy
- FMECA and FTA in Maintenance Planning
- Maintenance Schedules
- Technology Aspects
- Calibration

- Maintainability Prediction
- Maintainability Demonstration
- Design for Maintainability
- Integrated Logistic Support
- 17 Reliability Management
- Corporate Policy for Reliability
- Integrated Reliability Programmes
- Reliability and Costs
- Safety and Product Liability
- Standards for Reliability, Quality and Safety
- Specifying Reliability
- Contracting for Reliability Achievement
- Managing Lower-Level Suppliers
- The Reliability Manual
- The Project Reliability Plan
- Use of External Services
- Customer Management of Reliability
- Selecting and Training for Reliability
- Organization for Reliability
- Reliability Capability and Maturity of an Organization
- Managing Production Quality
- Quality Management Approaches
- Choosing the Methods: Strategy and Tactics
- Appendix 1 The Standard Cumulative Normal Distribution Function
- Appendix 2 $\chi^2_{(a, n)}$ Distribution Values
- Appendix 3 Kolmogorov-Smirnov Tables
- Appendix 4 Rank Tables (5%, 95%)
- Appendix 5 Failure Reporting, Analysis and Corrective Action System (FRACAS)
- Appendix 6 Reliability, Maintainability (and Safety) Plan Example
- Appendix 7 Matrix Algebra Revision
- Index
