

- Preface p. xi
- 1 Introduction p. 1
- 2 Introduction to Physics of the Solid State p. 8
- 2.1 Structure p. 8
- 2.1.1 Size Dependence of Properties p. 8
- 2.1.2 Crystal Structures p. 9
- 2.1.3 Face-Centered Cubic Nanoparticles p. 12
- 2.1.4 Tetrahedrally Bonded Semiconductor Structures p. 15
- 2.1.5 Lattice Vibrations p. 18
- 2.2 Energy Bands p. 20
- 2.2.1 Insulators, Semiconductors, and Conductors p. 20
- 2.2.2 Reciprocal Space p. 22
- 2.2.3 Energy Bands and Gaps of Semiconductors p. 23
- 2.2.4 Effective Masses p. 28
- 2.2.5 Fermi Surfaces p. 29
- 2.3 Localized Particles p. 30
- 2.3.1 Donors, Acceptors, and Deep Traps p. 30
- 2.3.2 Mobility p. 31
- 2.3.3 Excitons p. 32
- 3 Methods of Measuring Properties p. 35
- 3.1 Introduction p. 35
- 3.2 Structure p. 36
- 3.2.1 Atomic Structures p. 36
- 3.2.2 Crystallography p. 37
- 3.2.3 Particle Size Determination p. 42
- 3.2.4 Surface Structure p. 45
- 3.3 Microscopy p. 46
- 3.3.1 Transmission Electron Microscopy p. 46
- 3.3.2 Field Ion Microscopy p. 51
- 3.3.3 Scanning Microscopy p. 51
- 3.4 Spectroscopy p. 58
- 3.4.1 Infrared and Raman Spectroscopy p. 58
- 3.4.2 Photoemission and X-Ray Spectroscopy p. 62
- 3.4.3 Magnetic Resonance p. 68
- 4 Properties of Individual Nanoparticles p. 72
- 4.1 Introduction p. 72
- 4.2 Metal Nanoclusters p. 74
- 4.2.1 Magic Numbers p. 74
- 4.2.2 Theoretical Modeling of Nanoparticles p. 75
- 4.2.3 Geometric Structure p. 78
- 4.2.4 Electronic Structure p. 81
- 4.2.5 Reactivity p. 83
- 4.2.6 Fluctuations p. 86
- 4.2.7 Magnetic Clusters p. 86
- 4.2.8 Bulk to Nanotransition p. 88
- 4.3 Semiconducting Nanoparticles p. 90

- 4.3.1 Optical Properties p. 90
- 4.3.2 Photofragmentation p. 92
- 4.3.3 Coulombic Explosion p. 93
- 4.4 Rare Gas and Molecular Clusters p. 94
- 4.4.1 Inert-Gas Clusters p. 94
- 4.4.2 Superfluid Clusters p. 95
- 4.4.3 Molecular Clusters p. 96
- 4.5 Methods of Synthesis p. 97
- 4.5.1 RF Plasma p. 97
- 4.5.2 Chemical Methods p. 98
- 4.5.3 Thermolysis p. 99
- 4.5.4 Pulsed Laser Methods p. 100
- 4.6 Conclusion p. 101
- 5 Carbon Nanostructures p. 103
- 5.1 Introduction p. 103
- 5.2 Carbon Molecules p. 103
- 5.2.1 Nature of the Carbon Bond p. 103
- 5.2.2 New Carbon Structures p. 105
- 5.3 Carbon Clusters p. 106
- 5.3.1 Small Carbon Clusters p. 106
- 5.3.2 Discovery of C₆₀ p. 107
- 5.3.3 Structure of C₆₀ and Its Crystal p. 110
- 5.3.4 Alkali-Doped C₆₀ p. 110
- 5.3.5 Superconductivity in C₆₀ p. 112
- 5.3.6 Larger and Smaller Fullerenes p. 113
- 5.3.7 Other Buckyballs p. 113
- 5.4 Carbon Nanotubes p. 114
- 5.4.1 Fabrication p. 114
- 5.4.2 Structure p. 117
- 5.4.3 Electrical Properties p. 118
- 5.4.4 Vibrational Properties p. 122
- 5.4.5 Mechanical Properties p. 123
- 5.5 Applications of Carbon Nanotubes p. 125
- 5.5.1 Field Emission and Shielding p. 125
- 5.5.2 Computers p. 126
- 5.5.3 Fuel Cells p. 127
- 5.5.4 Chemical Sensors p. 128
- 5.5.5 Catalysis p. 129
- 5.5.6 Mechanical Reinforcement p. 130
- 6 Bulk Nanostructured Materials p. 133
- 6.1 Solid Disordered Nanostructures p. 133
- 6.1.1 Methods of Synthesis p. 133
- 6.1.2 Failure Mechanisms of Conventional Grain-Sized Materials p. 137
- 6.1.3 Mechanical Properties p. 139
- 6.1.4 Nanostructured Multilayers p. 141
- 6.1.5 Electrical Properties p. 142

- 6.1.6 Other Properties p. 147
- 6.1.7 Metal Nanocluster Composite Glasses p. 148
- 6.1.8 Porous Silicon p. 150
- 6.2 Nanostructured Crystals p. 153
- 6.2.1 Natural Nanocrystals p. 153
- 6.2.2 Computational Prediction of Cluster Lattices p. 153
- 6.2.3 Arrays of Nanoparticles in Zeolites p. 154
- 6.2.4 Crystals of Metal Nanoparticles p. 157
- 6.2.5 Nanoparticle Lattices in Colloidal Suspensions p. 158
- 6.2.6 Photonic Crystals p. 159
- 7 Nanostructured Ferromagnetism p. 165
- 7.1 Basics of Ferromagnetism p. 165
- 7.2 Effect of Bulk Nanostructuring of Magnetic Properties p. 170
- 7.3 Dynamics of Nanomagnets p. 172
- 7.4 Nanopore Containment of Magnetic Particles p. 176
- 7.5 Nanocarbon Ferromagnets p. 177
- 7.6 Giant and Colossal Magnetoresistance p. 181
- 7.7 Ferrofluids p. 186
- 8 Optical and Vibrational Spectroscopy p. 194
- 8.1 Introduction p. 194
- 8.2 Infrared Frequency Range p. 196
- 8.2.1 Spectroscopy of Semiconductors; Excitons p. 196
- 8.2.2 Infrared Surface Spectroscopy p. 198
- 8.2.3 Raman Spectroscopy p. 203
- 8.2.4 Brillouin Spectroscopy p. 210
- 8.3 Luminescence p. 213
- 8.3.1 Photoluminescence p. 213
- 8.3.2 Surface States p. 215
- 8.3.3 Thermoluminescence p. 221
- 8.4 Nanostructures in Zeolite Cages p. 222
- 9 Quantum Wells, Wires, and Dots p. 226
- 9.1 Introduction p. 226
- 9.2 Preparation of Quantum Nanostructures p. 227
- 9.3 Size and Dimensionality Effects p. 231
- 9.3.1 Size Effects p. 231
- 9.3.2 Conduction Electrons and Dimensionality p. 233
- 9.3.3 Fermi Gas and Density of States p. 234
- 9.3.4 Potential Wells p. 236
- 9.3.5 Partial Confinement p. 241
- 9.3.6 Properties Dependent on Density of States p. 242
- 9.4 Excitons p. 244
- 9.5 Single-Electron Tunneling p. 245
- 9.6 Applications p. 248
- 9.6.1 Infrared Detectors p. 248
- 9.6.2 Quantum Dot Lasers p. 251
- 9.7 Superconductivity p. 253

- 10 Self-Assembly and Catalysis p. 257
- 10.1 Self-Assembly p. 257
- 10.1.1 Process of Self-Assembly p. 257
- 10.1.2 Semiconductor Islands p. 258
- 10.1.3 Monolayers p. 260
- 10.2 Catalysis p. 264
- 10.2.1 Nature of Catalysis p. 264
- 10.2.2 Surface Area of Nanoparticles p. 264
- 10.2.3 Porous Materials p. 268
- 10.2.4 Pillared Clays p. 273
- 10.2.5 Colloids p. 277
- 11 Organic Compounds and Polymers p. 281
- 11.1 Introduction p. 281
- 11.2 Forming and Characterizing Polymers p. 283
- 11.2.1 Polymerization p. 283
- 11.2.2 Sizes of Polymers p. 284
- 11.3 Nanocrystals p. 285
- 11.3.1 Condensed Ring Types p. 285
- 11.3.2 Polydiacetylene Types p. 289
- 11.4 Polymers p. 292
- 11.4.1 Conductive Polymers p. 292
- 11.4.2 Block Copolymers p. 293
- 11.5 Supramolecular Structures p. 295
- 11.5.1 Transition-Metal-Mediated Types p. 295
- 11.5.2 Dendritic Molecules p. 296
- 11.5.3 Supramolecular Dendrimers p. 302
- 11.5.4 Micelles p. 305
- 12 Biological Materials p. 310
- 12.1 Introduction p. 310
- 12.2 Biological Building Blocks p. 311
- 12.2.1 Sizes of Building Blocks and Nanostructures p. 311
- 12.2.2 Polypeptide Nanowire and Protein Nanoparticle p. 314
- 12.3 Nucleic Acids p. 316
- 12.3.1 DNA Double Nanowire p. 316
- 12.3.2 Genetic Code and Protein Synthesis p. 322
- 12.4 Biological Nanostructures p. 324
- 12.4.1 Examples of Proteins p. 324
- 12.4.2 Micelles and Vesicles p. 326
- 12.4.3 Multilayer Films p. 329
- 13 Nanomachines and Nanodevices p. 332
- 13.1 Microelectromechanical Systems (MEMSs) p. 332
- 13.2 Nanoelectromechanical Systems (NEMSs) p. 335
- 13.2.1 Fabrication p. 335
- 13.2.2 Nanodevices and Nanomachines p. 339
- 13.3 Molecular and Supramolecular Switches p. 345
- A Formulas for Dimensionality p. 357

- A.1 Introduction p. 357
- A.2 Delocalization p. 357
- A.3 Partial Confinement p. 358
- B Tabulations of Semiconducting Material Properties p. 361
- Index p. 371
