

- Preface p. xxv
- Acknowledgments p. xxvii
- 1 Ergonomics Design Philosophy p. 1
- Ergonomics and Human Factors p. 1
- The Scope and Purpose of This Book p. 1
- Definitions p. 2
- The Benefits of Ergonomics and Human Factors p. 2
- Ergonomics at Eastman Kodak Company p. 3
- Ergonomics Program Characteristics in Other Companies p. 5
- Influences on Ergonomics Programs p. 5
- Regulatory Influences p. 5
- Participatory Ergonomics p. 10
- Specific Ergonomics Process Issues p. 11
- Program Examples p. 13
- Some Program/Process Traps to Avoid p. 16
- Summary p. 17
- An Ergonomics Problem-Solving Technique p. 18
- Background p. 18
- Sources Contributing to This Problem-Solving Technique p. 18
- The Problem-Solving Process p. 19
- For Whom Do We Design? p. 27
- Accommodate the Functional Capacities and Capabilities of a Large Majority of the Potential Workforce p. 27
- Why Design for the Large Majority? p. 28
- Determining Whom to Design for So Most People Can Work Comfortably p. 30
- Designing to Accommodate the Needs of Employees with Disabilities or Reduced Work Capacities p. 37
- Design of Lifting Tasks for People with Low Back Disorders p. 44
- Capacity and Capability Data p. 45
- Anthropometric Data p. 46
- United States and International Standards Related to Ergonomics p. 74
- Internet Locations for European and International Standards p. 75
- International Standards p. 75
- European Standards p. 76
- United Kingdom (UK) p. 79
- United States of America (USA) p. 80
- Canada p. 84
- Australia p. 84
- 2 Evaluation of Job Demands p. 99
- Principles p. 101
- Biomechanics p. 101
- Dynamic Motion p. 112
- Static Muscle Work p. 112
- Dynamic Work p. 115

- Psychophysical Scaling Methods p. 117
- Analysis Methods p. 121
- Qualitative Methods p. 121
- Semiquantitative Methods p. 127
- Quantitative Methods p. 165
- 3 Workplace Design p. 191
  - General Workplace Layout and Dimensions p. 191
  - Sitting Workplaces p. 194
  - Standing Workplaces p. 197
  - Computer Workstations p. 203
  - Selection of Computer Equipment p. 203
  - Workstation Design p. 204
  - Workstation Layout p. 213
  - Laboratories p. 217
    - General Principles of Laboratory Bench Design p. 218
    - Containment Cabinets and Glove Boxes p. 220
    - Microscope Workstations p. 224
    - Liquid Dispensing Stations p. 227
    - Visual Work Dimensions p. 228
      - Visual Field p. 228
      - Viewing Angle p. 230
      - Viewing Distance p. 233
      - Size of Visual Targets p. 233
    - Floors, Ramps, and Stairs p. 234
      - Floors p. 237
      - Ramps p. 240
      - Stairs and Ladders p. 242
    - Conveyors p. 247
    - Adjustable Workstations p. 249
    - Adjusting the Workplace p. 251
      - Adjusting the Person Relative to the Workplace p. 251
      - Adjusting the Workpiece or the Product p. 256
      - Adjusting the Tool (Design and Location of Tools) p. 257
- 4 Equipment Design p. 269
  - Overall Considerations p. 270
  - Physical Capability p. 270
  - Environment and Safety p. 272
  - Maintainability p. 273
    - Areas to Consider When Planning Maintainability Requirements p. 273
    - Design of Displays p. 280
      - Modes of Display p. 282
      - Equipment Visual Displays p. 283
    - Installation of Displays p. 294
    - Design of Controls p. 294

- Behavioral Stereotypes p. 295
- Design, Selection, and Location of Controls p. 299
- Computer Input Devices p. 304
- Computer Interface Controls p. 328
- Tool Design p. 342
- Postural Stress and Muscle Fatigue During Tool Use p. 343
- Pressure Points on the Hand p. 346
- Safety Aspects of Hand Tool Design p. 347
- Design and Selection Recommendations for Hand Tools p. 349
- Special-Purpose Tools p. 352
- Evaluation and Selection of Equipment p. 358
- 5 Human Reliability and Information Transfer p. 373
- Human Reliability p. 373
- Human Reliability Analysis (HRA) Techniques p. 374
- Cautions When Using HRAs p. 381
- Information Transfer p. 382
- Warnings p. 382
- Instructions p. 392
- Coding p. 395
- Forms and Surveys p. 398
- Labels and Signs p. 402
- 6 Work Design p. 411
- Organizational Factors in Work Design p. 411
- The Importance of Organizational Factors in Work Design p. 411
- Guidelines to Improve the Organizational Factors in Job Design p. 417
- Hours of Work: Shift Work and Overtime p. 421
- Introduction and Regulations p. 421
- Shift Work and Employee Health and Safety p. 422
- 8-Hour shifts Versus 12-Hour shifts p. 423
- Overtime Considerations p. 424
- Aging Considerations p. 424
- Shift Work Characteristics p. 425
- The Shift Work Design and Redesign Process p. 425
- Case Study: Shift Schedule Redesign Project p. 427
- Conclusions p. 433
- Ergonomic Work Design p. 435
- Goals in the Design of Jobs p. 435
- The Measurement of Work Capacities p. 436
- Designing to Minimize Fatigue p. 436
- Guidelines for the Design of Repetitive Work p. 455
- The Design of Repetitive Work p. 449
- Job Risk Factors p. 449
- Individual Risk Factors p. 452
- Management of MSDs in the Workplace p. 457

- Special Considerations: Design of Ultra-Short-Cycle Tasks p. 458
- The Design of Visual Inspection Tasks p. 469
- Measures of Inspection Performance p. 470
- Individual Factors p. 470
- Physical and Environmental Factors p. 473
- Task Factors p. 478
- Organizational Factors p. 481
- Guidelines to Improve Inspection Performance p. 484
- Ergonomics in the Construction Industry p. 485
- The Need for Ergonomics in the Construction Industry p. 485
- Construction Job Factors and MSDs p. 486
- Responsibility for Ergonomics p. 489
- Controlling Risk Factor Exposure p. 490
- Ergonomics Interventions in Construction p. 491
- Summary p. 495
- Work Design in Laboratory and Computer Workplaces p. 496
- Laboratory Task Design: Pipetting p. 496
- Work Patterns in Computer Tasks p. 497
- 7 Manual Handling in Occupational Tasks p. 511
- Background: Manual Handling and Musculoskeletal Injuries and Illnesses p. 511
- Types of Musculoskeletal Overexertion Injuries Seen in Manual Handling Tasks p. 511
- Strategies to Reduce Manual Handling Risk Factors p. 513
- Guidelines For the Design of Manual Lifting Tasks p. 520
- Factors That Contribute to Acceptable Weights for Lifting p. 521
- Guidelines for the Design of Occasional Lifts p. 529
- Guidelines for the Design of Frequent Lifting Tasks p. 534
- Guidelines for the Design of Carrying Tasks, Shoveling, and One-Handed Lifting Tasks p. 537
- Special Considerations in Manual Lifting Task Design p. 540
- The Design of Force Exertion Tasks p. 552
- Horizontal Forces Away from and Toward the Handler: Hand Cart and Truck Design Guidelines p. 553
- Other Horizontal Forces: Overhead, Seated, and Kneeling p. 557
- Vertical Pushing and Pulling p. 558
- Transverse or Lateral Forces Applied Horizontally p. 559
- 8 Environment p. 565
- Lighting and Color p. 565
- Visual Work Demands p. 565
- Basic Light Terminology p. 566
- Recommended Illuminance Levels p. 566
- Quality Issues p. 567
- Lighting Design p. 572
- Special Lighting Conditions p. 575
- Color p. 576

- Noise p. 578
- Hearing Loss p. 579
- Annoyance and Distraction p. 579
- Interference with Communication p. 582
- Measuring Noise Levels p. 584
- Performance Effects of Noise p. 586
- Approaches to Reducing Noise in the Workplace p. 587
- Special Considerations p. 588
- Thermal Environments p. 588
- Thermal Balance p. 589
- Thermal Comfort p. 596
- Warm Discomfort and Heat Stress p. 604
- Cool Discomfort and Cold Stress p. 612
- Vibration p. 617
- Introduction p. 617
- Measurement of Vibration p. 619
- Resonance p. 623
- Evaluation of Human Vibration p. 623
- Vibration Reduction and Control p. 626
- Case Studies p. 635
- Glossary p. 651
- Index p. 681
