

## Table of Contents

- 1 Statistics Success Stories And Cautionary Tales
  - What Is Statistics?
  - Eight Statistical Stories with Morals
  - The Common Elements in the Eight Stories
- 2 Turning Data Into Information
  - Raw Data
  - Types of Variables
  - Summarizing One or Two Categorical Variables
  - Exploring Features of Quantitative Data with Pictures
  - Numerical Summaries of Quantitative Variables
  - How to Handle Outliers
  - Bell-Shaped Distributions and Standard Deviations
  - Skillbuilder Applet: The Empirical Rule in Action
- 3 Relationships Between Quantitative Variables
  - Looking for Patterns with Scatterplots
  - Describing Linear Patterns with a Regression Line
  - Measuring Strength and Direction with Correlation
  - Regression and Correlation Difficulties and Disasters
  - Correlation Does Not Prove Causation
  - Skillbuilder Applet: Exploring Correlation
- 4 Relationships Between Categorical Variables
  - Displaying Relationships Between Categorical Variables
  - Risk, Relative Risk, and Misleading Statistics About Risk
  - The Effect of a Third Variable and Simpson's Paradox
  - Assessing the Statistical Significance of a 2 x 2 Table
- 5 Sampling: Surveys And How To Ask Questions
  - Collecting and Using Sample Data Wisely
  - Margin of Error, Confidence Intervals, and Sample Size
  - Choosing a Simple Random Sample
  - Other Sampling Methods
  - Difficulties and Disasters in Sampling
  - How to Ask Survey Questions
  - Skillbuilder Applet: Random Sampling in Action
- 6 Gathering Useful Data For Examining Relationships
  - Speaking the Language of Research Studies
  - Designing a Good Experiment
  - Designing a Good Observational Study
  - Difficulties and Disasters in Experiments and Observational Studies
- 7 Probability
  - Random Circumstances
  - Interpretations of Probability
  - Probability Definitions and Relationships
  - Basic Rules for Finding Probabilities
  - Finding Complicated Probabilities

- Using Simulation to Estimate Probabilities
- Flawed Intuitive Judgments About Probability
- 8 Random Variables
  - What Is a Random Variable?
  - Discrete Random Variables
  - Expectations for Random Variables
  - Binomial Random Variables
  - Continuous Random Variables
  - Normal Random Variables
  - Approximating Binomial Distribution Probabilities
  - Sums, Differences, and Combinations of Random Variables
- 9 Understanding Sampling Distributions: Statistics As Random Variables
  - Parameters, Statistics, and Statistical Inference
  - From Curiosity to Questions About Parameters
  - SD: Module 0 An Overview of Sampling Distributions
  - SD: Module 1 Sampling Distribution for One Sample Proportion
  - SD: Module 2 Sampling Distribution for the Difference in Two Sample Proportions
  - SD: Module 3 Sampling Distribution for One Sample Mean
  - SD: Module 4 Sampling Distribution for the Sample Mean of Paired Differences
  - SD: Module 5 Sampling Distribution for the Difference in Two Sample Means
  - Preparing for Statistical Inference: Standardized Statistics
  - Generalizations Beyond the Big Five
  - Skillbuilder Applet: Finding the Pattern in Sample Means
- 10 Estimating Proportions With Confidence
  - CI: Module 0 An Overview of Confidence Intervals
  - CI: Module 1 Confidence Interval for a Population Proportion
  - CI: Module 2 Confidence Intervals for the Difference in Two Population Proportions
  - Using Confidence Intervals to Guide Decisions
- 11 Estimating Means With Confidence
  - Introduction to Confidence Intervals for Means
  - CI: Module 3 Confidence Interval for One Population Mean
  - CI: Module 4 Confidence Interval for the Population Mean of Paired Differences
  - CI: Module 5 Confidence Interval for the Difference in Two Population Means (Independent Samples)
    - Understanding Any Confidence Interval
    - Skillbuilder Applet: The Confidence Level in Action
- 12 Testing Hypotheses About Proportions
  - HT: Module 0 An Overview of Hypothesis Testing
  - HT: Module 1 Testing Hypotheses About a Population Proportion
  - HT: Module 2 Testing Hypotheses About the Difference in Two Population Proportions
    - Sample Size, Statistical Significance, and Practical Importance
- 13 Testing Hypotheses About Means
  - Introduction to Hypothesis Tests for Means
  - HT: Module 3 Testing Hypotheses about One Population Mean
  - HT: Module 4 Testing Hypotheses about the Population Mean of Paired Differences

- HT: Module 5 Testing Hypotheses about the Difference in Two Population Means (Independent Samples)
  - The Relationship Between Significance Tests and Confidence Intervals
  - Choosing an Appropriate Inference Procedure
  - Effect Size
  - Evaluating Significance in Research Reports
- 14 Inference About Simple Regression
  - Sample and Population Regression Models
  - Estimating the Standard Deviation for Regression
  - Inference About the Slope of a Linear Regression
  - Predicting  $y$  and Estimating Mean  $y$  at a Specific  $x$
  - Checking Conditions for Using Regression Models for Inference
- 15 More About Inference For Categorical Variables
  - The Chi-Square Test for Two-Way Tables
  - Analyzing 2 x 2 Tables
  - Testing Hypotheses About One Categorical Variable: Goodness-of-Fit
- 16 Analysis Of Variance
  - Comparing Means with an ANOVA F-Test. Details of One-Way Analysis of Variance
  - Other Methods for Comparing Populations
  - Two-Way Analysis of Variance
- 17 Turning Information Into Wisdom
  - Beyond the Data
  - Transforming Uncertainty Into Wisdom
  - Making Personal Decisions
  - Control of Societal Risks
  - Understanding Our World
  - Getting to Know You
  - Words to the Wise
