

Table of Contents

- List of Contributors p. xi
- Acknowledgements p. xiii
- 1.1 The legal classification and denomination of olive oils p. 5
- Introduction p. 1
- Part I The product p. 3
- 1 The extra-virgin olive oil chain Claudio Peri p. 5
- 1.2 The subject of this handbook p. 7
- 1.4 Yield and quality p. 8
- Reference p. 10
- 2.1 The legal definition of virgin olive oil p. 11
- 2.2 Quality standards of virgin olive oil p. 12
- 1.3 The extra-virgin olive oil chain p. 7
- 2 Virgin olive oil: definition and standards Manuela Mariotii p. 11
- 2.3 Authenticity standards of virgin olive oil p. 19
- Reference p. 19
- 3 The composition and nutritional properties of extra-virgin olive oil Manuehi Mariotii and Claudio Peri p. 21
- 3.1 Triglycerides and fatty acids p. 21
- 3.2 The nutritional role of olive oil triglycerides and fatty acids p. 26
- 3.3 Minor components and antioxidant in extra-virgin olive oil p. 28
- 3.4 The colour and odour components of extra-virgin olive oil p. 31
- 3.5 Conclusion p. 32
- References p. 33
- 4 The sensory quality of extra-virgin olive oil Mario Bertuccloli and Erminio Monteleone p. 35
- 4.1 Introduction p. 35
- 4.2 The official evaluation of defects and positive sensory attributes p. 36
- 4.3 The sensory profile p. 41
- 4.4 Sensory performance of extra virgin olive oil food pairing p. 49
- Annex 4.1 The method for evaluating extra-virgin olive oil sensory profiles p. 53
- References p. 56
- 5 Olive tree cultivars Luana Ilarioni and Primo Proietti p. 59
- 5.1 Introduction p. 59
- 5.2 Cultivars p. 59
- 5.3 The cultivar's relationship to productivity p. 60
- 5.4 The cultivar's relationship to oil quality p. 64
- 5.5 Common-sense recommendations 65 References p. 67
- 6 The role of oxygen and water in the extra-virgin olive oil process Bruno Zanoni p. 69
- 6.1 The conflicting roles of oxygen p. 69
- 6.2 The role of wafer in the transformation of phenolic compounds p. 71
- References p. 74
- Further reading p. 74
- 7 Extra-virgin olive oil contaminants Cristina Alamprese p. 75
- 7.2 Contaminants of virgin olive oil p. 78

- References p. 84
- Part II The process p. 87
- 8 Olive harvesting Luigi Nasini and Primo Proietti p. 89
- 8.1 Introduction p. 89
- 5.2 Olive ripening p. 90
- 8.3 Harvesting systems p. 91
- Annex 8.1 Methods for olive maturity assessment p. 101
- 9 Olive handling, storage and transportation Primo Proietti p. 107
- 9.1 The autocatalytic nature of olives and oil degradation p. 107
- 9.2 Avoid mechanical damage to the olives p. 107
- 9.3 Control the time-temperature relationship p. 109
- 7.1 Introduction p. 75
- References p. 105
- 9.4 Management of the harvesting-milling link p. 112
- References p. 112
- 10 Olive cleaning Claudio Peri p. 113
- 10.1 Introduction p. 113
- 10.2 The separation section p. 113
- 10.3 The washing section p. 114
- 10.4 Control points p. 115
- 11 Olive milling and pitting Alessandro Leone p. 117
- 11.1 Introduction p. 117
- 11.2 Milling machines p. 119
- 11.3 Pitting machines p. 124
- References p. 126
- 12 Olive paste malaxation Antonia Tamborrino p. 127
- 12.1 Basic phenomena in malaxation p. 127
- 12.2 Malaxers p. 132
- Reference p. 136
- 13 Centrifugal separation Lamberto Baccioni and Claudio Peri p. 139
- 13.1 Introduction p. 139
- 13.2 The three-phase process p. 140
- 13.3 The two-phase process p. 142
- 13.4 Decanters p. 142
- 13.5 Disc centrifuges p. 148
- 13.6 Final comments and remarks p. 151
- Further reading p. 153
- 14 Filtration of extra-virgin olive oil Claudio Peri p. 155
- 14.1 Introduction p. 155
- 14.2 Filtration principles p. 156
- 14.3 The filter media p. 159
- 14.4 Filtration equipment p. 159
- 14.5 Filtration systems p. 160
- 14.6 Conclusion p. 164
- Further reading p. 164
- 15 Extra-virgin olive oil storage and handling Claudio Peri p. 165

- 15.1 Introduction p. 165
- 15.2 Prevention of temperature abuse p. 166
- 15.3 Prevention of exposure to air (oxygen) p. 168
- 15.4 Prevention of exposure to light p. 170
- 15.5 Prevention of water and organic residues in the oil p. 171
- 15.6 Prevention of exposure to contaminated atmosphere and poor hygienic standards p. 171
- 15.7 Prevention of mechanical stress p. 171
- Annex 15.1 Pumps, tanks and piping p. 172
- Reference p. 178
- Further reading p. 178
- 16 Extra-virgin olive oil packaging Sara Limbo and Claudia Peri and Luciano Piergiovanni p. 179
- 16.1 Introduction p. 179
- 16.2 The packaging process p. 181
- 16.3 The packaging materials p. 185
- 16.4 The packaging operation p. 189
- References p. 198
- Further reading p. 199
- 17 The olive oil refining process Claudio Peri p. 201
- 17.1 Introduction p. 201
- 17.2 The process of extraction of crude pomace oil p. 202
- 17.5 The quality and uses, of refined olive oil p. 208
- 17.3 The refining process p. 205
- 17.4 The physical refining process p. 208
- Reference p. 210
- Further reading p. 210
- Part III The process control system p. 211
- 18.3 Control of critical points p. 220
- 18 Process management system (PUIS) Claudio Peri p. 213
- 18.1 Introduction p. 213
- 18.2 The structure of a PMS p. 214
- 18.4 Risk analysis: a blanket rule for management decisions p. 224
- Annex 18.1 Excellence in extra-virgin olive oil p. 226
- References p. 243
- Further reading p. 243
- 19 Extra-virgin olive oil traceability Bruno Zanoni p. 245
- 19.1 Introduction p. 245
- 19.2 Four basic steps p. 246
- 19.3 Comments and conclusion p. 249
- References p. 249
- Further reading p. 250
- 20 Product and process certification Ardian Marjani p. 251
- 20.1 Aims and approaches p. 251
- 20.2 Product and process certification p. 253
- 20.3 The selection of a certification system p. 257

- Further reading p. 261
- 21 The hygiene of the olive oil factory Cristina Alamprese and Bruno Zanoni p. 263
- 21.1 Introduction p. 263
- 21.2 Hygiene of the external environment and buildings p. 264
- Annex 18.2 An exercise of integrated risk analysis applied to the process of extra-virgin olive oil p. 230
- 20.4 The certification procedure p. 260
- Reference p. 261
- 21.4 Hygiene of the personnel p. 269
- 21.5 Hygiene management system (HMS) and HACCP p. 270
- Annex 21.1 Hygienic design p. 276
- Reference p. 281
- Further reading p. 282
- 22 Olive mill waste and by-products Claudio Peri and Primo Proietti p. 283
- 22.1 Introduction p. 283
- 22.2 Composition, treatment and uses of olive mill wastewater p. 285
- Annex 22.1 Mass balance of the extra virgin olive oil process p. 296
- Reference p. 302
- Further reading p. 302
- 23 The production cost of extra-virgin olive oil Enrico Bertolotti p. 303
- 23.1 Introduction p. 303
- 23.2 Concepts, terms and definitions p. 305
- 21.3 Hygiene of the plant p. 268
- 22.3 Composition, treatment and uses of olive mill pomace p. 291
- 23.3 Hypotheses for the cost analysis p. 306
- 23.4 Cost calculation p. 308
- 23.5 Total cost p. 317
- Further reading p. 318
- 24 The culinary uses of extra-virgin olive oil Alan Tardi p. 321
- 24.1 A brief history of the olive p. 321
- 24.2 Old versus new: expanded culinary possibilities offered by excellent extra-virgin olive oil p. 324
- 24.3 Excellent extra-virgin olive oil as a condiment, at the table and in the kitchen p. 330
- 24.4 Putting excellent extra-virgin olive oils to work p. 332
- References p. 337
- 25 An introduction to life-cycle assessment (LCA) Stefano Rossi p. 339
- 25.1 Introduction p. 339
- 25.2 Methodological approach p. 340
- 25.3 Limits and advantages of the carbon footprint p. 342
- 25.4 Environment.il communication strategies p. 343
- References p. 347
- Appendix p. 349
- Index p. 361
- 25.5 The food sector p. 344

- 24.5 Education and communication: revolutionizing the perception of olive oil one drop at a time p. 335
