

## Table of Contents

- Foreword p. xiii
- Preface p. xv
- Acknowledgments p. xvii
- About the Book p. xix
- 1 Overview of Biomaterials p. 1
- Authors p. xxi
- 1.3 Impact of Biomaterials p. 9
- 1.5.2 Ceramic Biomaterials p. 19
- 1.5.3 Polymeric Biomaterials p. 19
- 1.5.4 Composite Biomaterials p. 20
- 1.1 Introduction p. 1
- 1.2 Biomaterials: From Then to Now p. 3
- 1.4 Characteristics of Biomaterials p. 11
- 1.5.1 Metallic Biomaterials p. 18
- 1.5 Classification of Biomaterials p. 14
- 1.6 Surface Modification of Biomaterials p. 20
- 1.7 Recent Trends in Biomaterials p. 22
- 1.7.1 Nanobiomaterials: A New Generation Biomaterial p. 22
- 1.7.2 Processing of Nanobiomaterials p. 23
- 1.7.2.1 Sol-Gel Processing p. 23
- 1.7.2.2 Biomimetic Processing p. 24
- 1.7.2.3 Tissue Engineering Approach p. 26
- 1.8 Summary p. 28
- References p. 32
- 2 Basics of Human Biology p. 35
- Introduction p. 35
- Structure and Function of the Human Body p. 35
- Chemical Level p. 36
- Cellular Level p. 37
- Nucleus p. 38
- Cell Membrane p. 39
- 2.4.3.1 Transport across the Cell Membrane p. 40
- 2.5 Tissue Level p. 41
- 2.5.1 Epithelial Tissue p. 42
- Glossary p. 29
- Cytoplasm p. 39
- 2.5.2 Connective Tissue p. 43
- 2.5.3 Muscle Tissue p. 43
- 2.5.4 Nerve Tissue p. 44
- 2.6 Organ Level p. 44
- 2.6.1 Skin p. 44
- 2.6.2 Bone p. 46
- 2.7 System Level p. 49
- Glossary p. 51

- References p. 54
- Further Reading p. 55
- 3 Degradation and Corrosion of Biomaterials p. 57
- 3.1 Introduction p. 57
- 3.2 Surface Properties p. 57
- 3.3 Degradation of Biomaterials p. 62
- 3.4 Corrosion of Biomaterials p. 63
- 3.4.1 Galvanic Corrosion p. 66
- 3.4.2 Crevice Corrosion p. 66
- 3.4.3 Pitting Corrosion p. 66
- 3.4.4 Intergranular Corrosion p. 67
- 3.4.5 Stress Corrosion p. 67
- 3.4.6 Fretting Corrosion p. 68
- 3.5 Methods of Corrosion Testing p. 68
- 3.6 Biocompatibility of Implants p. 70
- 3.6.1 In Vitro Test Methods p. 71
- 3.6.2 In Vivo Test Methods p. 73
- 3.7 Case Study p. 74
- 3.8 Summary p. 77
- Glossary p. 77
- References p. 78
- Further Reading p. 79
- 4 Failure and Tribology of Biomaterials p. 81
- 4.1 Introduction p. 81
- 4.2 Deformation Mechanics p. 82
- 4.2.1 Elastic Deformation p. 84
- 4.2.2 Plastic Deformation p. 85
- 4.3 Deformation Analysis of Biomaterials p. 86
- 4.4 Fracture Mechanics p. 88
- 4.5 Classification of Fracture p. 91
- 4.5.1 Brittle Fracture p. 92
- 4.5.2 Ductile Fracture p. 93
- 4.6 Brittle to Ductile Transition of Biomaterials p. 94
- 4.7 Fracture Toughness p. 96
- 4.8 Toughness Analysis of Biomaterials p. 100
- 4.9 Fatigue Mechanics p. 104
- 4.10 Fatigue Analysis of Biomaterials p. 107
- 4.11 Tribology p. 109
- 4.11.1 Friction p. 109
- 4.11.2 Wear p. 111
- 4.12 Tribological Analysis of Biomaterials p. 114
- 4.13 Case Study p. 117
- 4.14 Summary p. 119
- Glossary p. 119
- References p. 121
- Further Reading p. 121

- 5 Nanoscale Phenomena p. 123
- 5.1 Introduction p. 123
- 5.2 Nanoscale Phenomena p. 125
- 5.2.1 Properties at Nanoscale p. 126
- 5.3 Processing of Nanostructured Materials p. 129
- 5.3.1 Top-Down Methods p. 130
- 5.3.2 Bottom-Up Methods p. 134
- 5.4 Characterization Techniques p. 139
- 5.4.1 X-Ray Diffraction and Scattering Methods p. 140
- 5.4.2 Electron Microscopy p. 141
- 5.4.3 Scanning Probe Microscopy p. 143
- 5.4.4 Light Scattering Techniques p. 145
- 5.4.5 Gas Adsorption Measurements p. 147
- 5.5 Environmental and Safety Aspects of Nanomaterials p. 148
- 5.6 Summary p. 155
- Glossary p. 155
- References p. 157
- Further Reading p. 159
- 6 Metallic Biomaterials p. 161
- 6.1 Introduction p. 161
- 6.2 Metallic Biomaterials p. 161
- 6.2.1 Stainless Steels p. 163
- 6.2.2 Cobalt-Chromium Alloys p. 168
- 6.2.4 Shape Memory Alloys p. 172
- 6.2.5 Dental Amalgam Alloys p. 175
- 6.2.6 Noble and Other Metals p. 175
- 6.3 Nanostructured Metallic Implants p. 176
- 6.4 Case Study p. 179
- 6.5 Summary p. 183
- Glossary p. 184
- References p. 185
- 7 Ceramic Biomaterials p. 187
- 7.2 Bioceramics p. 187
- 7.2.1 Nearly Inert Bioceramics p. 189
- 7.2.2 Porous Bioceramics p. 193
- 6.2.3 Titanium and Titanium-Based Alloys p. 169
- 7.1 Introduction p. 187
- 7.2.3 Bioactive Bioceramics p. 194
- 7.2.3.1 Bioactive Glasses p. 195
- 7.2.3.2 Calcium Phosphate Ceramics p. 197
- 7.2.4 Bioresorbable Bioceramics p. 200
- 7.3 Nanostructured Bioceramics p. 201
- 7.4 Synthesis and Characterization of Nano Bioceramics p. 201
- 7.4.1 Synthesis and Characterization of Nano Alumina p. 202
- 7.4.2 Synthesis and Characterization of Nano Calcium Phosphate Ceramics p. 208
- 7.5 Case Study p. 211

- 7.6 Summary p. 212
- Glossary p. 213
- References p. 214
- 8 Polymeric Biomaterials p. 217
- 8.1 Introduction p. 217
- 8.1.1 Polymerization Process p. 217
- 8.1.1.1 Addition Polymerization p. 217
- 8.1.1.2 Condensation Polymerization p. 218
- 8.1.2 Types of Polymers p. 219
- 8.1.3 Factors Influencing the Properties of Polymers p. 221
- 8.1.3.1 Molecular Weight p. 221
- 8.1.3.2 Molecular Structures p. 221
- 8.1.3.3 Intermolecular Forces p. 222
- 8.1.3.4 Polymer Crystallinity p. 223
- 8.1.4 Polymer Characterization p. 224
- 8.2 Polymers as Biomaterials p. 224
- 8.3 Classification of Polymeric Biomaterials p. 225
- 8.4 Naturally Derived Polymers p. 226
- 8.4.1 Collagen p. 227
- 8.4.2 Gelatin p. 228
- 8.4.3 Chitosan p. 228
- 8.5 Synthetic Polymers p. 229
- 8.5.1 Nonbiodegradable Synthetic Polymers p. 229
- 8.5.1.1 Poly(methyl methacrylate) p. 229
- 8.5.1.2 Poly(ethylene) p. 230
- 8.5.1.3 Poly(ethylene terephthalate) p. 230
- 8.5.2 Biodegradable Synthetic Polymers p. 230
- 8.5.2.1 Poly(lactic acid) p. 230
- 8.5.2.2 Poly(glycolic acid) p. 231
- 8.5.2.3 Poly(lactic-co-glycolic acid) p. 231
- 8.6 Polymeric Nanobiomaterials p. 231
- 8.7 Processing of Polymer Nanofibers: Current Scenarios p. 232
- 8.7.1 Drawing p. 233
- 8.7.2 Template Synthesis p. 233
- 8.7.3 Self-Assembly p. 237
- 8.7.4 Phase Separation p. 237
- 8.7.5 Electrospinning: A New Approach p. 239
- 8.7.5.1 Experimental System p. 240
- 8.7.5.2 Spinning Mechanism p. 240
- 8.8 Electrospun Polymer Nanofibrous Scaffolds p. 248
- 8.8.1 Collagen Nanofibrous Scaffold p. 248
- 8.8.2 Gelatin Nanofibrous Scaffold p. 250
- 8.8.3 Chitosan Nanofibrous Scaffold p. 250
- 8.8.4 Poly(L-lactic acid) Nanofibrous Scaffold p. 251
- 8.8.5 Poly(glycolic acid) Nanofibrous Scaffold p. 252
- 8.8.6 Poly(lactic-co-glycolic acid) Nanofibrous Scaffold p. 254

- 8.9 Biomedical Applications of Polymer Nanofibers p. 254
- 8.9.1 Medical Prostheses p. 255
- 8.9.2 Dental Restoration p. 256
- 8.9.3 Wound Dressing p. 256
- 8.9.4 Drug Delivery p. 258
- 8.9.5 Tissue Scaffolds p. 259
- 8.10 Summary p. 259
- Glossary p. 260
- References p. 261
- 9 Composite Biomaterials p. 263
- 9.1 Introduction p. 263
- 9.2 Classification of Composite Biomaterials p. 265
- 9.2.1 Fibrous Composite Biomaterials p. 265
- 9.2.2 Particulate Composite Biomaterials p. 266
- 9.3 Biological Responses to Composite Biomaterials p. 269
- 9.4 Biomedical Applications of Composite Biomaterials p. 269
- 9.4.1 Bone Fracture Repair p. 271
- 9.4.1.1 Bone Plates and Screws p. 273
- 9.4.2 Joint Replacements p. 275
- 9.4.2.1 Total Hip Replacement p. 276
- 9.4.3 Bone Graft Materials p. 278
- 9.4.4 Dental Applications p. 280
- 9.4.4.1 Dental Restorative Materials p. 281
- 9.4.4.2 Dental Post p. 282
- 9.4.4.3 Dental Arch Wires and Brackets p. 283
- 9.5 Evolution of Nanocomposite Biomaterials p. 284
- 9.6 Nanocomposites: A New Class of Nanobiomaterials p. 285
- 9.7 Conventional Nanocomposites p. 286
- 9.8 Biomimetic Nanocomposites p. 288
- 9.9 Tissue-Engineered Nanocomposites p. 290
- 9.10 Nanocomposites for Growth Factor Delivery p. 292
- 9.11 Summary p. 295
- Glossary p. 295
- References p. 297
- 10 Nanobiomaterials for Tissue Regeneration p. 299
- 10.1 Introduction p. 299
- 10.2 Concept of Tissue Engineering p. 300
- 10.3 The Promise of Stem Cells p. 301
- 10.3.1 Mesenchymal Stem Cells p. 302
- 10.4 Nanobiomaterials: A New Generation Scaffolding Material p. 304
- 10.5 Characteristics of a Scaffold p. 305
- 10.6 Types of Scaffolding Materials p. 306
- 10.6.1 Ceramic Nanobiomaterials p. 307
- 10.6.2 Polymeric Nanobiomaterials p. 307
- 10.7 Scaffold Designing Using Nanobiomaterials p. 308
- 10.8 Tissue-Engineered Ceramic Nanobiomaterials p. 308

- 10.9 Tissue-Engineered Polymeric Nanobiomaterials p. 311
- 10.10 Patterning of Biomaterials for Cell Engineering p. 314
- 10.10.1 Chemical Patterning p. 316
- 10.10.1.1 Patterning by Microcontact Printing p. 317
- 10.10.2 Topographical Patterning p. 320
- 10.10.2.1 Nanoimprint Lithography p. 321
- 10.11 Tissue-Engineered Products: The Artificial Skin and Cartilage p. 324
- 10.12 Case Study p. 326
- 10.13 Summary p. 328
- Glossary p. 330
- References p. 333
- Index p. 335
