Table of Contents

- Preface p. xvii
- Authors p. xix
- 1 World Systems Framework for Oil and Gas Industry p. 1
- A Multitiered Systems View p. 2
- The Gasoline Pump System p. 17
- Quantitative Systems Modeling p. 17
- Cost-Schedule-Quality Constraints p. 18
- Engineering Project Management p. 22
- Some Case Examples p. 6
- Energy Costs p. 10
- What Is a System? p. 12
- What Is Systems Engineering? p. 14
- Embracing Project Management p. 15
- Education and Workforce Development Issues p. 11
- Example of System Value Modeling p. 21
- System of Systems Framework p. 12
- What Is System of Systems? p. 12
- What Is a Project System? p. 13
- System of Systems Value Modeling p. 19
- Role of Emerging Nations p. 24
- References p. 25
- 2 Characteristics of Oil and Gas Projects p. 27
- Government Involvement p. 29
- Fate of Refineries p. 30
- Oil Sands Project p. 30
- BP to Invest $4 Billion in Gulf of Mexico in 2012 p. 30
- Flak of Fracking p. 31
- Keystone Oil Pipeline p. 34
- New Projects, New Project Management Opportunities p. 35
- Gas Export Project Management p. 35
- Case Example of Shell's Use of PMBOK p. 36
- Hail to Project Management p. 37
- Technology Project Management p. 37
- Project Management Improves Well Control Events p. 38
- Team Management p. 39
- Project Scope p. 40
- Tracking Models p. 43
- Critical Path Method p. 44
- Decision Trees p. 44
- Oil Bunkering in Developing Nations p. 45
- 3 Project Management Body of Knowledge p. 47
- Project Management Knowledge Areas p. 48
- Rules, Laws, Regulations, and Standards p. 33
- Scheduling p. 43

- Project Management Improve Operations p. 37
- Organizational Structures p. 41
- References p. 45
- Project Definitions p. 49
- Project p. 49
- Project Management p. 50
- Project Management Methodology p. 50
- Project Management Information System p. 51
- Project Management System p. 51
- Composition of a Program p. 51
- Identification of Stakeholders p. 52
- Project Management Processes p. 53
- Factors of STEP Project Success or Failure p. 56
- Work Breakdown Structure p. 57
- Project Organization Structures p. 58
- Traditional Formal Organization Structures p. 59
- Functional Organization p. 60
- Projectized Organization p. 62
- Matrix Organization Structure p. 64
- Elements of a Project Plan p. 66
- Integrated Systems Approach to STEP Projects p. 67
- Managing Project Requirements p. 67
- Project Integration p. 68
- Stepwise Project Integration p. 69
- Step 1 Develop Project Charter p. 70
- Step 2 Develop Preliminary Project Scope Statement p. 78
- Step 3 Develop Project Management Plan p. 78
- Step 4 Direct and Manage Project Execution p. 81
- Step 5 Monitor and Control Project Work p. 82
- Step 6 Integrated Change Control p. 84
- Step 7 Close Project p. 86
- Project Sustainability p. 88
- 4 Oil and Gas Project Communication p. 91
- Communications Management: Step-by-Step Implementation p. 91
- Complexity of Multiperson Communication p. 92
- Using the Triple C Model p. 95
- Typical Triple C Questions p. 98
- How to Accomplish Triple C Communication p. 99
- SMART Communication p. 103
- How to Achieve Cooperation p. 105
- Implementing Coordination p. 107
- Conflict Resolution Using Triple C Approach p. 107
- References p. 111
- 5 Critical Path Method for Oil and Gas Projects p. 113
- Critical Path Method p. 115
- Rule 1 p. 118

- Rule 2 p. 119
- Rule 3 p. 119
- Rule 4 p. 119
- Rule 5 p. 119
- Rule 6 p. 119
- Rule 7 p. 119
- Rule8 p. 120
- CPM Example p. 120
- Forward Pass p. 120
- Backward Pass p. 121
- The Critical Path p. 122
- Gantt Charts p. 125
- Schedule Compression p. 127
- PERT Formulas p. 133
- PERT Example p. 135
- Precedence Diagramming Method p. 137
- Work Rate Analysis p. 144
- Work Rate Examples p. 146
- A Fuel Consumption Rate Example p. 148
- Team Work Rate Analysis p. 149
- Learning Curve Analysis p. 150
- 6 The Drag Efficient: The Missing Quantification of Time on the Critical Path p. 155
- Drag and Drag Cost p. 155
- Impact of Critical Path on Project Investment p. 156
- Gaps in Traditional Critical Path Data p. 156
- Computing the Drag Cost of an Activity p. 160
- Computing the True Cost of an Activity p. 160
- A Concluding Anecdote p. 162
- References p. 165
- 7 Decision Tools for Project Management in the Oil and Gas Industry p. 167
- Process Operational Definition p. 167
- Process Mapping p. 170
- Cpk Process Capability Index p. 172
- Capable Process (Cp) p. 173
- Activity Networks p. 114
- Program Evaluation and Review Technique p. 132
- Introduction p. 155
- Capability Index (Cpk) p. 173
- Lean Principles p. 176
- Kaizen p. 178
- DEJI p. 180
- Military Plane Case Example p. 180
- Design Stage of DEJI p. 181
- Design Transformation due to Technology Changes p. 182
- Evaluation Stage of DEJI p. 184
- Half-Life Analysis p. 184

- Justification Stage of DEJI p. 186
- Integration Stage of DEJI p. 188
- Computational Example p. 191
- DMAIC p. 193
- STPOC p. 195
- DRIVE p. 195
- 6s/5s p. 198
- PICK Chart p. 199
- Quantification of the PICK Chart p. 200
- Quality Circle p. 202
- PokaYoke p. 203
- Culture and Attitude p. 203
- Quantifying Operational Efficiency p. 204
- Project Decision Analysis p. 206
- Group Decision Making p. 208
- Bramstorming p. 210
- Nominal Group Technique p. 212
- Interviews, Surveys, and Questionnaires p. 213
- Multivote p. 214
- Supplier Selection Decision p. 215
- Wadhwa-Ravindran Supplier Selection Technique p. 216
- ICOR p. 196
- Kanban p. 201
- Delphi Method p. 210
- Weighted Objective Method p. 219
- Goal Programming p. 219
- Compromise Programming p. 221
- References p. 223
- 8 Project Schedule Forecast and Control: Reliable Schedule Forecasting in Federal Design-Build Facility Procurement p. 225
- Introduction p. 225
- Objective p. 227
- Limitations p. 227
- Case Study Project Descriptions p. 227
- Project 1 p. 228
- Project 2 p. 229
- Project 3 p. 229
- Research Question and Methods p. 229
- Analysis and Results p. 230
- Recommendation p. 235
- Conclusions p. 237
