

Table of Contents

- Preface p. xiii
- About the Authors p. xv
- Transportation p. 3
- Waiting p. 4
- 1 Global Issues in Sustainability p. 1
- Inventory p. 3
- Morton p. 4
- What Happens Globally if We Are Not Sustainable? p. 13
- 2 Systems View of Sustainability p. 15
- What Is a System? p. 15
- A Systems Engineering Framework p. 15
- Definitions of Sustainability p. 16
- The Many Languages of Sustainability p. 19
- What Is Sustainability? p. 19
- Foci of Sustainability p. 20
- Value Sustainability p. 21
- Using the Hierarchy of Needs for Sustainability p. 21
- Reference p. 27
- 3 Lean and Waste Reduction p. 29
- References p. 41
- 4 Education and Sustainability p. 43
- Strategic Role of Sustainability Education p. 44
- University-Industry Sustainability Partnership p. 46
- Sustainability Clearinghouse p. 47
- Agriculture and Sustainability p. 49
- Evolution of Efficient Agriculture p. 49
- Emergence of Cities p. 50
- DEJI Model for Sustainability Assessment p. 52
- Overprocessing p. 4
- Areas of Sustainability p. 6
- How to Use Poka-Yokes p. 38
- References p. 14
- Resource Consciousness p. 19
- Sustainability Matrix p. 24
- Social Change for Sustainability p. 25
- Human Resources for Sustainability p. 50
- Center of Excellence for Sustainability p. 48
- The Role of Women in Achieving Sustainability p. 48
- The Role of Technology in Sustainability p. 51
- Foundation for Sustaining Sustainability p. 53
- References p. 54
- 5 Six Sigma for Sustainability p. 55
- Project Charter p. 58
- SIPOC p. 58

- Kano Model p. 62
- CTQ p. 63
- Affinity Diagram p. 64
- Measurement Systems Analysis p. 66
- Gauge R&R p. 66
- Variation p. 69
- Process Capabilities p. 72
- Capable Process (C_p) p. 72
- Capability Index (C_{pk}) p. 73
- Possible Applications of the Process Capability Index p. 74
- Potential Abuse of C_p and C_{pk} p. 75
- Graphical Analysis p. 79
- Process Mapping p. 80
- Cause-and-Effect Diagram p. 80
- Failure Mode and Effect Analysis (FMEA) p. 82
- Hypothesis Testing p. 83
- ANOVA p. 86
- Correlation p. 87
- Simple Linear Regression p. 88
- Correlations: Trial 1, Time p. 89
- Analysis of Variance p. 90
- Unusual Observations p. 90
- Hypothesis Testing p. 91
- Conclusion p. 90
- Theory of Constraints p. 93
- Single-Minute Exchange of Die (SMED) p. 94
- Description of Stage 1-Separate Internal vs. External Setup p. 97
- Checklists p. 97
- Function Checks p. 99
- Improved Transport of Parts and Tools p. 99
- Description of Stage 2-Convert Internal Setups to External Setups p. 99
- I Advance Preparation of Conditions p. 99
- II Function Standardization p. 99
- III Implementing Function Standardization with Two Steps p. 99
- Description of Stage 3-Streamline All Aspects of the Setup Operation p. 100
- Ask Questions p. 100
- Improving Storage and Transport p. 101
- Streamlining Internal Setup p. 101
- Implementing Parallel Operations p. 101
- TPM-Total Productive Maintenance p. 101
- Design for Six Sigma p. 104
- Quality Function Deployment p. 105
- Design of Experiments p. 105
- Control Charts p. 109
- X-Bar and Range Charts p. 109
- Attribute Data Formulas p. 112

- Example p. 113
- Control Plans p. 114
- References p. 117
- 6 Technology Transfer for Sustainability p. 119
- Definition and Characteristics of Technology p. 119
- Technology Assessment p. 122
- Sustainability Changeover Strategies p. 127
- Post-Implementation Evaluation p. 127
- Technology Systems Integration p. 128
- Sustainability Performance Evaluation p. 128
- Sustainability Schedule Problems p. 129
- Sustainability Cost Problems p. 129
- Sustainability Planning p. 129
- Technology Overview p. 130
- Technology Goal p. 130
- Sustainability Policy p. 130
- Sustainability Technology Procedures p. 130
- Sustainability Resources p. 131
- Sustainability Technology Budget p. 131
- Sustainability Operating Characteristics p. 131
- Sustainability Cost/Benefit Analysis p. 131
- Technology Performance Measures p. 131
- Sustainability Technology Organization p. 132
- Sustainability Work Breakdown Structure p. 132
- Potential Technology Problems p. 132
- Sustainability Technology Transfer Modes p. 125
- Sustainability Performance Problems p. 129
- Strategic Planning p. 130
- Sustainability Technology Acquisition Process p. 132
- Reference p. 133
- 7 Sampling and Estimation for Sustainability p. 135
- Statistical Sampling p. 135
- Sampling Techniques p. 135
- Sample p. 136
- Systematic Sampling p. 136
- Stratified Sampling p. 137
- Errors in Sampling p. 137
- Sampling Error p. 139
- Nonsampling Error p. 139
- Sampling Bias p. 139
- Stratified Sampling p. 139
- Cluster Sampling p. 140
- Measurement Scales p. 141
- Data Determination and Collection p. 143
- Point Estimates p. 146
- Unbiased Estimators p. 146

- Interval Estimates p. 147
- Data Analysis and Presentation p. 148
- Raw Data p. 148
- Total Revenue p. 150
- Average Revenue p. 150
- Median Revenue p. 153
- Quartiles and Percentiles p. 153
- The Mode p. 155
- Range of Revenue p. 155
- Average Deviation p. 155
- Sample Variance p. 156
- Standard Deviation p. 158
- Calculation Example p. 159
- Diagnostic Tools p. 160
- Flowcharts p. 162
- Pareto Diagram p. 162
- Scatter Plots p. 163
- Run Charts and Check Sheets p. 163
- Histogram p. 163
- Calculations under the Normal Curve p. 164
- Project Tracking and Reporting p. 184
- 8 Managing Sustainability Projects p. 169
- Why Projects Fail p. 172
- Management by Project p. 173
- Project Management Body of Knowledge p. 177
- Integrated Project Implementation p. 175
- Problem Identification p. 182
- Resource Allocation p. 183
- Critical Factors for Project Success p. 176
- Components of the Knowledge Areas p. 178
- Step-by-Step and Component-by-Component Implementation p. 179
- Project Organizing p. 183
- Project Systems Structure p. 182
- Project Scheduling p. 184
- Project Definition p. 183
- Project Planning p. 183
- Project Termination p. 185
- Project Systems Implementation Outline p. 185
- Planning p. 185
- Organizing p. 186
- Scheduling (Resource Allocation) p. 187
- Control (Tracking, Reporting, and Correction) p. 187
- Termination (Close, Phaseout) p. 188
- Documentation p. 188
- Sustainability Communication p. 188
- Sustainability Cooperation p. 189

- Sustainability Coordination JA p. 189
- Project Decision Analysis p. 190
- Step 1 Problem Statement p. 190
- Step 2 Data and Information Requirements p. 191
- Step 3 Performance Measure p. 191
- Step 4 Decision Model p. 192
- Step 5 Making the Decision p. 193
- Systems Group Decision-Making Models p. 193
- Brainstorming p. 195
- Delphi Method p. 195
- Interviews, Surveys, and Questionnaires p. 198
- Multivote p. 199
- Hierarchy of Project Control p. 200
- Reference p. 206
- Appendix A Cumulative Normal Probability Tables (Z-Values) p. 207
- Index p. 225
- Nominal Group Technique p. 197
- Project Control p. 184
- Appendix B Six Sigma Glossary p. 211
- Step 6 Implementing the Decision p. 193
