

- Introduction p. xxi
- Chapter 1 Exploring the PHP Environment p. 1
  - Introducing the Tip of the Day Program p. 2
  - Programming on the Web Server p. 3
  - Installing PHP and Apache p. 4
  - Installing Apache p. 6
  - Installing PHP p. 10
  - Adding PHP to Your Pages p. 12
  - Configuring Your Version of PHP p. 15
  - Creating the Tip of the Day Program p. 18
  - Summary p. 19
- Chapter 2 Using Variables and Input p. 21
  - Introducing the Story Program p. 22
  - Using Variables in Your Scripts p. 23
  - Using Variables for More-Complex Pages p. 28
  - Working with Numeric Variables p. 30
  - Creating a Form to Ask a Question p. 33
  - Sending Data without a Form p. 36
  - Reading Input from Other Form Elements p. 40
  - Returning to the Story Program p. 46
  - Summary p. 54
- Chapter 3 Controlling Your Code with Conditions and Functions p. 55
  - Examining the Petals Around the Rose Game p. 56
  - Creating a Random Number p. 56
  - Using the if Statement to Control Program Flow p. 58
  - Working with Negative Results p. 63
  - Working with Multiple Values p. 66
  - Using the switch Structure to Simplify Programming p. 69
  - Combining a Form and Its Results p. 71
  - Responding to Checkboxes p. 74
  - Using Functions to Encapsulate Parts of the Program p. 77
  - Using Parameters and Function Values p. 80
  - Managing Variable Scope p. 85
  - Returning to the Petals Game p. 88
  - Summary p. 94
- Chapter 4 Loops and Arrays p. 95
  - Introducing the Poker Dice Program p. 96
  - Counting with the for Loop p. 96
  - Modifying the for Loop p. 100
  - Using a while Loop p. 103
  - Working with Basic Arrays p. 107
  - Improving This Old Man with Arrays and Loops p. 111
  - Keeping Persistent Data p. 114
  - Writing the Poker Dice Program p. 117

- Summary p. 130
- Chapter 5 Better Arrays and String Handling p. 133
  - Introducing the Word Search Program Creator p. 134
  - Using the foreach Loop to Work with an Array p. 135
  - Creating an Associative Array p. 137
  - Using Built-In Associative Arrays p. 141
  - Creating a Multidimensional Array p. 144
  - Making a Two-Dimensional Associative Array p. 150
  - Summary p. 179
- Manipulating String Values p. 154
- Returning to the Word Search Creator p. 160
- Chapter 6 Working with Files p. 181
  - Previewing the Quiz Machine p. 182
  - Viewing the Quiz Log p. 185
  - Saving a File to the File System p. 185
  - Loading a File from the Drive System p. 189
  - Reading a File into an Array p. 192
  - Working with Directory Information p. 194
  - Working with Formatted Text p. 200
  - Creating the QuizMachine.php Program p. 203
  - Summary p. 226
- Chapter 7 Writing Programs with Objects p. 229
  - Introducing the SuperHTML Object p. 230
  - Understanding OOP p. 248
  - Building the SuperHTML Class p. 260
  - Summary p. 269
- Chapter 8 XML and Content Management Systems p. 271
  - Introducing XCMS p. 272
  - Understanding Content Management Systems p. 273
  - Introducing simpleCMS p. 278
  - Improving the CMS with XML p. 285
  - Introducing XML Parsers p. 288
  - Returning to XCMS p. 296
  - Summary p. 298
- Chapter 9 Using MySQL to Create Databases p. 299
  - Creating a Database p. 305
  - Introducing the Adventure Generator Program p. 300
  - Using a Database Management System p. 302
  - Working with MySQL p. 303
  - Writing a Script to Build a Table p. 313
  - Working with a Database via phpMyAdmin p. 315
  - Creating More-Powerful Queries p. 322
  - Returning to the Adventure Game p. 328
  - Summary p. 334

- Chapter 10 Connecting to Databases within PHP p. 335
- Connecting to the Hero Database p. 336
- Returning to the Adventure Game Program p. 342
- Summary p. 356
- Chapter 11 Data Normalization p. 359
- Introducing the spy Database p. 360
- The badSpy Database p. 361
- Designing a Better Data Structure p. 363
- Building Your Data Tables p. 367
- Building a Link Table for Many-to-Many Relationships p. 376
- Summary p. 380
- Chapter 12 Building a Three-Tiered Data Application p. 383
- Creating the spyLib Library Module p. 406
- Introducing the SpyMaster Program p. 384
- Building the Design of the SpyMaster System p. 389
- Writing the Non-Library Code p. 393
- Summary p. 427
- Appendix A Reviewing HTML and Cascading Style Sheets
- Appendix B Using SQLite as an Alternative Data Source
- Index p. 429
