Table of contents provided by Syndetics

- **Foreword** (p. xix)
- **Acknowledgments** (p. xxiii)
- **Introduction** (p. xxv)
- **Who Is This Book For?** (p. xxvi)
- **What Can You Expect to Learn?** (p. xxvii)
- **About This Book** (p. xxvii)
- **1 Getting started** (p. 1)
- **The Operating Environment** (p. 1)
- **NumPy** (p. 2)
- **Scikit-learn** (p. 2)
- **Keras with TensorFlow** (p. 2)
- **Installing the Toolkits** (p. 3)
- **Basic Linear Algebra** (p. 4)
- **Vectors** (p. 4)
- **Matrices** (p. 5)
- **Multiplying Vectors and Matrices** (p. 5)
- **Statistics and Probability** (p. 6)
- **Descriptive Statistics** (p. 6)
- **Probability Distributions** (p. 7)
- **Statistical Tests** (p. 8)
- **Graphics Processing Units** (p. 9)
- **Summary** (p. 9)
- **2 Using python** (p. 11)
- **The Python Interpreter** (p. 11)
- **Statements and Whitespace** (p. 12)
- **Variables and Basic Data Structures** (p. 13)
- **Representing Numbers** (p. 13)
- **Variables** (p. 14)
- **Strings** (p. 14)
- **Lists** (p. 15)
- **Dictionaries** (p. 18)
- **Control Structures** (p. 19)
- **If-elif-else Statements** (p. 19)
- **For Loops** (p. 19)
- **While Loops** (p. 22)
- **Break and continue Statements** (p. 22)
- **With Statement** (p. 23)
- **Handling Errors with try-except Blocks** (p. 24)
- **Functions** (p. 24)
- **Modules** (p. 26)
- **Summary** (p. 27)
- **3 Using NumPy** (p. 29)
- **Why NumPy?** (p. 29)
- **Arrays vs. Lists** (p. 30)

- **Testing Array and List Speed** (p. 31)
- **Basic Arrays** (p. 33)
- **Defining an Array with np.array** (p. 33)
- **Defining Arrays with 0s and Is** (p. 36)
- **Accessing Elements in an Array** (p. 37)
- **Indexing into an Array** (p. 37)
- **Slicing an Array** (p. 39)
- **The Ellipsis** (p. 41)
- **Operators and Broadcasting** (p. 42)
- **Array Input and Output** (p. 45)
- **Random Numbers** (p. 48)
- **NumPyand Images** (p. 48)
- **Summary** (p. 50)
- **4 Working with data** (p. 51)
- **Classes and Labels** (p. 51)
- **Features and Feature Vectors** (p. 51)
- **Types of Features** (p. 53)
- **Feature Selection and the Curse of Dimensionality** (p. 55)
- **Features of a Good Dataset** (p. 57)
- **Interpolation and Extrapolation** (p. 58)
- **The Parent Distribution** (p. 60)
- **Prior Class Probabilities** (p. 60)
- **Confuses** (p. 61)
- **Dataset Size** (p. 62)
- **Data Preparation** (p. 63)
- **Scaling Features** (p. 63)
- **Missing Features** (p. 67)
- **Training, Validation, and Test Data** (p. 68)
- **The Three Subsets** (p. 68)
- **Partitioning the Dataset** (p. 69)
- **k-Fold Cross Validation** (p. 74)
- **Look at Your Data** (p. 76)
- **Searching for Problems in the Data** (p. 76)
- **Cautionary Tales** (p. 80)
- **Summary** (p. 81)
- **5 Building datasets** (p. 83)
- **Irises** (p. 84)
- **Breast Cancer** (p. 86)
- **MNIST Digits** (p. 88)
- **CIFAR-10** (p. 90)
- **Data Augmentation** (p. 92)
- **Why Should You Augment Training Data?** (p. 93)
- **Ways to Augment Training Data** (p. 94)
- **Augmenting the Iris Dataset** (p. 95)
- **Augmenting the CIFAR-10 Dataset** (p. 101)
- **Summary** (p. 105)

- **6 Classical machine learning** (p. 107)
- **Nearest Centroid** (p. 108)
- **k-Nearest Neighbors** (p. 112)
- **Naïve Bayes** (p. 113)
- **Decision Trees and Random Forests** (p. 117)
- **Recursion Primer** (p. 120)
- **Building Decision Trees** (p. 121)
- **Random Forests** (p. 122)
- **Support Vector Machines** (p. 124)
- **Margins** (p. 124)
- **Support Vectors** (p. 126)
- **Optimization** (p. 126)
- **Kernels** (p. 127)
- **Summary** (p. 128)
- **7 Experiments with classical models** (p. 129)
- **Experiments with the Iris Dataset** (p. 129)
- **Testing the Classical Models** (p. 130)
- **Implementing a Nearest Centroid Classifier** (p. 133)
- **Experiments with the Breast Cancer Dataset** (p. 135)
- **Two Initial Test Runs** (p. 135)
- **The Effect of Random Splits** (p. 138)
- **Adding k-fold Validation** (p. 140)
- **Searching for Hyperparameters** (p. 145)
- **Experiments with the MNIST Dataset** (p. 150)
- **Testing the Classical Models** (p. 150)
- **Analyzing Runtimes** (p. 156)
- **Experimenting with PCA Components** (p. 158)
- **Scrambling Our Dataset** (p. 161)
- **Classical Model Summary** (p. 162)
- **Nearest Centroid** (p. 162)
- **k-Nearest Neighbors** (p. 163)
- **Naïve Bayes** (p. 163)
- **Decision Trees** (p. 164)
- **Random Forests** (p. 164)
- **Support Vector Machines** (p. 165)
- **When to Use Classical Models** (p. 165)
- **Handling Small Datasets** (p. 165)
- **Dealing with Reduced Computational Requirements** (p. 165)
- **Having Explainable Models** (p. 166)
- **Working with Vector Inputs** (p. 166)
- **Summary** (p. 167)
- **8 Introduction to neural networks** (p. 169)
- **Anatomy of a Neural Network** (p. 170)
- **The Neuron** (p. 171)
- **Activation Functions** (p. 172)
- **Architecture of a Network** (p. 176)

- **Output Layers** (p. 178)
- **Representing Weights and Biases** (p. 180)
- **Implementing a Simple Neural Network** (p. 182)
- **Building the Dataset** (p. 182)
- **Implementing the Neural Network** (p. 183)
- **Training and Testing the Neural Network** (p. 185)
- **Summary** (p. 188)
- **9 Training a neural network** (p. 189)
- **A High-Level Overview** (p. 190)
- **Gradient Descent** (p. 190)
- **Finding Minimums** (p. 192)
- **Updating the Weights** (p. 193)
- **Stochastic Gradient Descent** (p. 194)
- **Batches and Minibatches** (p. 195)
- **Convex vs. Nonconvex Functions** (p. 196)
- **Ending Training** (p. 197)
- **Updating the Learning Rate** (p. 198)
- **Momentum** (p. 199)
- **Backpropagafion** (p. 200)
- **Backprop, Take 1** (p. 200)
- **Backprop, Take 2** (p. 204)
- **Loss Functions** (p. 208)
- **Absolute and Mean Squared Error Loss** (p. 209)
- **Cross-Entropy Loss** (p. 210)
- **Weight Initialization** (p. 211)
- **Overfilling and Regularization** (p. 213)
- **Understanding Overfilling** (p. 213)
- **Understanding Regularization** (p. 215)
- **L2 Regularization** (p. 216)
- **Dropout** (p. 217)
- **Summary** (p. 219)
- **10 Experiments with neural networks** (p. 221)
- **Our Dataset** (p. 222)
- **The MLPClassifier Class** (p. 222)
- **Architecture and Activation Functions** (p. 223)
- **The Code** (p. 223)
- **The Results** (p. 227)
- **Batch Size** (p. 231)
- **Base Learning Rate** (p. 235)
- **Training Set Size** (p. 238)
- **L2 Regularization** (p. 239)
- **Momentum** (p. 242)
- **Weight Initialization** (p. 243)
- **Feature Ordering** (p. 247)
- **Summary** (p. 249)
- **11 Evaluating models** (p. 251)

- **Definitions and Assumptions** (p. 251)
- **Why Accuracy Is Not Enough** (p. 252)
- **The 2 × 2 Confusion Matrix** (p. 254)
- **Metrics Derived from the 2 × 2 Confusion Matrix** (p. 257)
- **Deriving Metrics from the 2 × 2 Table** (p. 257)
- **Using Our Metrics to Interpret Models** (p. 260)
- **More Advanced Metrics** (p. 262)
- **Informedness and Markedness** (p. 262)
- **F1 Score** (p. 263)
- **Cohen's Kappa** (p. 263)
- **Matthews Correlation Coefficient** (p. 264)
- **Implementing Our Metrics** (p. 264)
- **The Receiver Operating Characteristics Curve** (p. 266)
- **Gathering Our Models** (p. 266)
- **Plotting Our Metrics** (p. 268)
- **Exploring the ROC Curve** (p. 269)
- **Comparing Models with ROC Analysis** (p. 271)
- **Generating an ROC Curve** (p. 273)
- **The Precision-Recall Curve** (p. 275)
- **Handling Multiple Classes** (p. 276)
- **Extending the Confusion Matrix** (p. 276)
- **Calculating Weighted Accuracy** (p. 279)
- **Multiclass Matthews Correlation Coefficient** (p. 281)
- **Summary** (p. 282)
- **12 Introduction to convolutional neural networks** (p. 283)
- **Why Convolutional Neural Networks?** (p. 284)
- **Convolution** (p. 284)
- **Scanning with the Kernel** (p. 285)
- **Convolution for Image Processing** (p. 287)
- **Anatomy of a Convolutional Neural Network** (p. 288)
- **Different Types of Layers** (p. 289)
- **Passing Data Through the CNN** (p. 291)
- **Convolutional Layers** (p. 292)
- **How a Convolution Layer Works** (p. 292)
- **Using a Convolutional Layer** (p. 295)
- **Multiple Convolutional Layers** (p. 298)
- **Initializing a Convolutional Layer** (p. 299)
- **Pooling Layers** (p. 299)
- **Fully Connected Layers** (p. 301)
- **Fully Convolutional Layers** (p. 302)
- **Step by Step** (p. 304)
- **Summary** (p. 308)
- **13 Experiments with keras and MNIST** (p. 309)
- **Building CNNs in Keras** (p. 310)
- **Loading the MNIST Data** (p. 310)
- **Building Our Model** (p. 312)

- **Training and Evaluating the Model** (p. 314)
- **Plotting the Error** (p. 317)
- **Basic Experiments** (p. 319)
- **Architecture Experiments** (p. 319)
- **Training Set Size, Minibatches, and Epochs** (p. 323)
- **Optimizers** (p. 326)
- **Fully Convolutional Networks** (p. 328)
- **Building and Training the Model** (p. 328)
- **Making the Test Images** (p. 331)
- **Testing the Model** (p. 333)
- **Scrambled MNIST Digits** (p. 340)
- **Summary** (p. 342)
- **14 Experiments with CIFAR-10** (p. 343)
- **A CIFAR-10 Refresher** (p. 343)
- **Working with the Full CIFAR-10 Dataset** (p. 344)
- **Building the Models** (p. 345)
- **Analyzing the Models** (p. 348)
- **Animal or Vehicle?** (p. 352)
- **Binary or Multiclass?** (p. 357)
- **Transfer Learning** (p. 361)
- **Fine-Tuning a Model** (p. 367)
- **Building Our Datasets** (p. 368)
- **Adapting Our Model for Fine-Tuning** (p. 371)
- **Testing Our Model** (p. 373)
- **Summary** (p. 375)
- **15 A case study: Classifying Audio Samples** (p. 377)
- **Building the Dataset** (p. 378)
- **Augmenting the Dataset** (p. 379)
- **Preprocessing Our Data** (p. 383)
- **Classifying the Audio Features** (p. 385)
- **Using Classical Models** (p. 385)
- **Using a Traditional Neural Network** (p. 388)
- **Using a Convolutional Neural Network** (p. 389)
- **Spectrograms** (p. 394)
- **Classifying Spectrograms** (p. 398)
- **Initialization, Regularization, and Batch Normalization** (p. 402)
- **Examining the Confusion Matrix** (p. 403)
- **Ensembles** (p. 404)
- **Summary** (p. 408)
- **16 Going further** (p. 411)
- **Going Further with CNNs** (p. 411)
- **Reinforcement Learning and Unsupervised Learning** (p. 412)
- **Generative Adversarial Networks** (p. 413)
- **Recurrent Neural Networks** (p. 414)
- **Online Resources** (p. 414)
- **Conferences** (p. 415)

- **The Book** (p. 416)
- **So Long and Thanks for All the Fish** (p. 416)
- **Index** (p. 417)
