

- **Preface** (p. ix)
- **Acknowledgements** (p. xi)
- **1 Introduction** (p. 1)
- **1.1 Background** (p. 1)
- **1.2 The human form** (p. 3)
- **1.3 Basic anatomical terminology** (p. 4)
- **2 Medical imaging for rapid prototyping** (p. 8)
- **2.1 Introduction to medical imaging** (p. 8)
- **2.2 Computed Tomography (CT)** (p. 9)
- **2.3 Magnetic Resonance (MR)** (p. 19)
- **2.4 Non-contact surface scanning** (p. 25)
- **2.5 Recommended reading** (p. 31)
- **3 Export data format and media** (p. 32)
- **3.1 Medical scan data** (p. 32)
- **3.2 Point cloud data** (p. 34)
- **3.3 Media** (p. 35)
- **4 Working with medical scan data** (p. 37)
- **4.1 Pixel data operations** (p. 37)
- **4.2 Using CT data - a worked example** (p. 42)
- **4.3 Point cloud data operations** (p. 45)
- **4.4 Two-dimensional formats** (p. 47)
- **4.5 Pseudo three-dimensional formats** (p. 47)
- **4.6 True three-dimensional formats** (p. 50)
- **5 Physical reproduction - rapid prototyping technologies** (p. 59)
- **5.1 Background to rapid prototyping** (p. 59)
- **5.2 Stereolithography (SL)** (p. 72)
- **5.3 Digital Light Processing (DLP)** (p. 76)
- **5.4 Fused Deposition Modelling (FDM)** (p. 78)
- **5.5 Selective Laser Sintering (SLS)** (p. 81)
- **5.6 Three-dimensional printing** (p. 87)
- **5.7 Jetting head technology** (p. 89)
- **5.8 Laminated Object Manufacture (LOM)** (p. 91)
- **5.9 Computer Numerical Controlled (CNC) machining** (p. 94)
- **6 Case studies** (p. 97)
- **Implementation** (p. 99)
- **6.1 Implementation case study 1: The development of a collaborative medical modelling service - organisational and technical considerations** (p. 99)
- **6.2 Implementation case study 2: Medical rapid prototyping technologies - state of the art and current limitations for application in oral and maxillofacial surgery** (p. 110)
- **Surgical applications** (p. 128)
- **6.6 Surgical applications case study 4: Rapid manufacture of custom fitting surgical guides** (p. 148)
- **6.3 Surgical applications case study 1: Planning osseointegrated implants using computer-aided design and rapid prototyping** (p. 128)

- **6.4 Surgical applications case study 2: The use of a reconstructed three-dimensional solid model from CT to aid the surgical management of a total knee arthroplasty** (p. 136)
- **6.5 Surgical applications case study 3: The custom-made titanium orbital floor prosthesis in reconstruction of orbital floor fractures** (p. 141)
- **6.7 Surgical applications case study 5: The use of three-dimensional technology in the multidisciplinary management of facial disproportion** (p. 159)
- **Rehabilitation applications** (p. 165)
- **6.8 Rehabilitation applications case study 1: An investigation of three-dimensional scanning of human body surfaces and its use in the design and manufacture of prostheses** (p. 165)
- **6.9 Rehabilitation applications case study 2: Producing burns therapy conformers using non-contact scanning and rapid prototyping** (p. 173)
- **6.10 Rehabilitation applications case study 3: An appropriate approach to computer-aided design and manufacture of cranioplasty plates** (p. 182)
- **6.11 Rehabilitation applications case study 4: The appropriate application of computer-aided design and manufacture techniques in silicone facial prosthetics** (p. 194)
- **6.12 Rehabilitation applications case study 5: Evaluation of advanced technologies in the design and manufacture of an implant retained facial prosthesis** (p. 205)
- **6.13 Rehabilitation applications case study 6: The computer-aided design and rapid prototyping fabrication of removable partial denture frameworks** (p. 219)
- **6.14 Rehabilitation applications case study 7: Rapid manufacture of removable partial denture frameworks** (p. 233)
- **Research applications** (p. 244)
- **6.15 Research applications case study 1: Bone structure models using stereolithography** (p. 244)
- **6.16 Research applications case study 2: Producing physical models from CT scans of ancient Egyptian mummies** (p. 253)
- **6.17 Research applications case study 3: Recreating skin texture relief using computer-aided design and rapid prototyping** (p. 262)
- **7 Future developments** (p. 276)
- **7.1 Background** (p. 276)
- **7.2 Scanning techniques** (p. 276)
- **7.3 Data fusion** (p. 278)
- **7.4 Communication** (p. 278)
- **7.5 Rapid prototyping** (p. 278)
- **7.6 Tissue engineering** (p. 279)
- **Glossary and explanatory notes** (p. 280)
- **Bibliography** (p. 285)
- **Index** (p. 295)
