

# Table of contents

- **1 Introduction**
- **The importance of manufacture and erection**
- **Ambition, aim and scheme of the book**
- **2 Materials For Tensile Surface Structures**
- **Introduction**
- **Structural composition and manufacture**
- **Linear load-bearing elements**
- **Surface load-bearing elements**
- **Material behaviour of coated fabrics**
- **Mechanical properties**
- **Fabrication of coated fabrics**
- **Development**
- **Compensation, strip layout**
- **Criteria for the patterning**
- **Cutting out the pieces**
- **Methods of jointing surfaces**
- **Permanent surface joints**
- **Reusable surface joints**
- **Methods of transferring force at the edge**
- **Geometry of the edging and effect on bearing behaviour**
- **The detailing of edges and their anchorage at corners**
- **Edge details**
- **Corner details**
- **3 Construction Of Tensile Surface Structures**
- **Introduction**
- **Construction management**
- **Aims and tasks of construction management**
- **Scheduling**
- **Modelling erection procedures**
- **Construction engineering**
- **Design detailing for erection practicality**
- **Erection equipment and machinery**
- **Cranes and lifting devices**
- **Tensioning devices and equipment for ropes**
- **Tensioning devices and aids for membrane sheets**
- **Scaffolding working platforms and temporary construction**
- **Erection procedure**
- **Criteria affecting the erection procedure**
- **Remarks about the erection of the primary structure**
- **Erection procedures for membrane structures**
- **Construction**
- **Preparation work and preassembly**
- **Lifting and hanging structural elements**
- **Introduction of loads - pretensioning**

- **Control of the forces in flexible structural elements**
- **Determination of force in ropes**
- **Measurement of membrane stresses**
- **4 Summary And Outlook**
- **References**
- **Illustration acknowledgements**
- **Projects (1989-2007)**
