

# Contents

Preface	ix
---------	----

## 1. Introducing Mechatronics 1

1.1 What is mechatronics?	1
1.2 The design process	3
1.3 Systems	4
1.4 Measurement systems	6
1.5 Control systems	7
1.6 Programmable logic controller	17
1.7 Examples of mechatronic systems	18
Summary	20
Problems	21

## 2. Sensors and Transducers 22

2.1 Sensors and transducers	22
2.2 Performance terminology	23
2.3 Displacement, position and proximity	28
2.4 Velocity and motion	39
2.5 Force	42
2.6 Fluid pressure	42
2.7 Liquid flow	46
2.8 Liquid level	47
2.9 Temperature	48
2.10 Light sensors	53
2.11 Selection of sensors	54
2.12 Inputting data by switches	55
Summary	58
Problems	58

6.1 Summary	133
6.2 Problems	137
6.3 Further reading	138
6.4 Summary	139

## 3. Signal Conditioning 62

3.1 Signal conditioning	62
3.2 The operational amplifier	63
3.3 Protection	73
3.4 Filtering	75
3.5 Wheatstone bridge	76
3.6 Pulse modulation	81
Summary	82
Problems	82

## 4. Digital Signals 84

4.1 Digital signals	84
4.2 Analogue and digital signals	84
4.3 Digital-to-analogue and analogue-to-digital converters	88
4.4 Multiplexers	94
4.5 Data acquisition	95
4.6 Digital signal processing	98
Summary	99
Problems	99

## 5. Digital Logic 101

5.1 Digital logic	101
5.2 Logic gates	102
5.3 Applications of logic gates	108
5.4 Sequential logic	114
Summary	121
Problems	121

6.1 Summary	133
6.2 Problems	137
6.3 Further reading	138
6.4 Summary	139

<b>6. Data Presentation Systems</b>	<b>123</b>	9.3 Solid-state switches	194
6.1 Displays	123	9.4 Solenoids	200
6.2 Data presentation elements	124	9.5 D.C. motors	201
6.3 Magnetic recording	129	9.6 A.C. motors	208
6.4 Optical recording	133	9.7 Stepper motors	210
6.5 Displays	134	Summary	216
6.6 Data acquisition systems	138	Problems	216
6.7 Measurement systems	141		
6.8 Testing and calibration	145		
Summary	146		
Problems	147		
<b>7. Pneumatic and Hydraulic Actuation Systems</b>	<b>150</b>		
7.1 Actuation systems	150	<b>10. Basic System Models</b>	<b>218</b>
7.2 Pneumatic and hydraulic systems	150	10.1 Mathematical models	218
7.3 Directional control valves	154	10.2 Mechanical system building blocks	219
7.4 Pressure control valves	158	10.3 Electrical system building blocks	226
7.5 Cylinders	160	10.4 Fluid system building blocks	230
7.6 Servo and proportional control valves	163	10.5 Thermal system building blocks	237
7.7 Process control valves	165	Summary	239
7.8 Rotary actuators	170	Problems	240
Summary	171		
Problems	171		
<b>8. Mechanical Actuation Systems</b>	<b>173</b>		
8.1 Mechanical systems	173	<b>11. System Models</b>	<b>243</b>
8.2 Types of motion	174	11.1 Engineering systems	243
8.3 Kinematic chains	176	11.2 Rotational-translational systems	243
8.4 Cams	179	11.3 Electromechanical systems	244
8.5 Gears	181	11.4 Linearity	247
8.6 Ratchet and pawl	184	11.5 Hydraulic-mechanical systems	249
8.7 Belt and chain drives	184	Summary	252
8.8 Bearings	186	Problems	252
8.9 Mechanical aspects of motor selection	188		
Summary	190		
Problems	190		
<b>9. Electrical Actuation Systems</b>	<b>192</b>	<b>12. Dynamic Responses of Systems</b>	<b>253</b>
9.1 Electrical systems	192	12.1 Modelling dynamic systems	253
9.2 Mechanical switches	192	12.2 Terminology	254
		12.3 First-order systems	256
		12.4 Second-order systems	262
		12.5 Performance measures for second-order systems	268
		12.6 System identification	271
		Summary	271
		Problems	273
<b>13. System Transfer Functions</b>	<b>275</b>		
		13.1 The transfer function	275
		13.2 First-order systems	278

<b>21. Programmable Logic Controllers</b>	<b>440</b>	<b>23. Fault Finding</b>	<b>486</b>
21.1 Programmable logic controller	440	23.1 Fault-detection techniques	486
21.2 Basic PLC structure	440	23.2 Watchdog timer	487
21.3 Input/output processing	444	23.3 Parity and error coding checks	488
21.4 Ladder programming	445	23.4 Common hardware faults	489
21.5 Instruction lists	449	23.5 Microprocessor systems	491
21.6 Latching and internal relays	452	23.6 Emulation and simulation	494
21.7 Sequencing	454	23.7 PLC systems	496
21.8 Timers and counters	455	Summary	498
21.9 Shift registers	458	Problems	499
21.10 Master and jump controls	459		
21.11 Data handling	460		
21.12 Analogue input/output	462		
Summary	464		
Problems	465		
<b>22. Communication Systems</b>	<b>467</b>	<b>24. Mechatronic Systems</b>	<b>500</b>
22.1 Digital communications	467	24.1 Mechatronic designs	500
22.2 Centralised, hierarchical and distributed control	467	24.2 Case studies	511
22.3 Networks	470	Summary	525
22.4 Protocols	472	Problems and assignments	525
22.5 Open Systems Interconnection communication model	473	Research assignments	526
22.6 Serial communication interfaces	476	Design assignments	526
22.7 Parallel communication interfaces	480		
22.8 Wireless protocols	484		
Summary	484		
Problems	485		
		<b>Appendices</b>	
		A. The Laplace Transform	527
		B. Number Systems	537
		C. Boolean Algebra	543
		D. Instruction Sets	552
		E. C Library Functions	557
		F. MATLAB and SIMULINK	560
		<b>Further Information</b>	566
		<b>Answers</b>	568
		<b>Index</b>	583

## Supporting resources

Visit [www.pearsoned.co.uk/bolton](http://www.pearsoned.co.uk/bolton) to find valuable online resources

### For instructors

- Supporting notes
- Bank of multiple choice questions with answers
- Suggestions for solutions to design assignments
- PowerPoint slides containing all the images from the book

For more information please contact your local Pearson Education sales representative or visit  
[www.pearsoned.co.uk/bolton](http://www.pearsoned.co.uk/bolton)
