ELEMENTARY ENGINEERING DRAWING

TABLE OF CONTENTS

CHAPTER 1 DRAWING INSTRUMENTS AND THEIR USES 001-020

1-1. Introduction 01
1-2. Drawing board 02
1-3. T-square 02
1-4. Set-squares 04
1-5. Drawing instrument box 07
(1) Large-size compass with inter chang eable pencil and pen legs 08
(2) Lengthening bar 08
(3) Small bow compass 08
(4) Large-size divider 09
(5) Small bow divider 09
(6) Small bow ink-pen 10
(7) Inking pen 10
1-6. Scales 10
1-7. Protractor 12
1-8. French curves 12
1-9. Drawing papers 13
1-10. Drawing pencils 13
1-11. Eraser (Rubber) 14
1-12. Drawing pins, Clips or adhesive tapes 14
1-13. Sand-paper block 15
1-14. Duster 15
1-15. Drafting machine 15
1-16. Roll-N-Draw 16
1-17. General suggestions for drawing a sheet 16
(1) Cleaning the instruments . 16
(2) Pinning the paper to the drawing board 16
(3) Border lines 17
(4) Spacing of drawings 17
Exercises I 18

CHAPTER 2 SHEET LAYOUT AND FREE-HAND SKETCHING .. 021-032

2-1. Sheet layout 21
(1) Sheet sizes, (2) Margin ... 21
(3) Border lines, (4) Borders & frames 21
(5) Orientation mark 21
(6) Grid reference system 22
(7) Title block 22
(8) List of parts or the bill of materials 23
(9) Revisions of drawing 23
(10) Folding marks 24
(11) Scales and scale drawing . 25
2-2. Types of machine drawings 26
(1) Production drawing 26
(2) Exploded assembly drawing 26
(3) Schematic assembly drawing 26
(4) Drawing for instruction manual 26
(5) Drawing for installation ... 26
(6) Drawing for catalogue 26
(7) Tabular drawing 26
(8) Patent drawing 26
2-3. Free-hand Sketching 26
(1) Sketching or freehand 26
(2) Sketching materials 27
(3) To sketch straight lines ... 27
(4) To sketch circles and arcs . 27
(5) Sketching procedure 28
(6) Steps in sketching 28
Exercises II 30

CHAPTER 3 LINES, LETTERING AND DIMENSIONING 033-050

3-0. Introduction 33
3-1. Lines 33
(1) Line thickness 33
(2) Inked drawings 33
(3) Pencil drawings 33
3-1-1. Types of Lines 35
(1) Outlines 35
(2) Margin lines 35
(3) Dimension lines 35
(4) Extension or projection lines 35
(5) Construction lines 35
(6) Hatching or section lines . 35
(7) Leader or pointer lines ... 35
(8) Border lines 35
(9) Short-break lines 35
(10) Long-break lines 35
(11) Hidden or dotted lines 35
(12) Centre lines 35
(13) Cutting-plane lines 36
(14) Chain thick 36
(15) Chain thick double-dots .. 36
3-2. Lettering 37
(1) Single-stroke letters 37
(2) Gothic letters 40
3-3. Dimensioning 40
3-4. Dimensioning terms and notations 41
(1) Dimension line 41
(2) Extension line 41
(3) Arrowhead, (4) Leader 41
3-5. Placing of dimensions 42
(1) Aligned system 42
(2) Unidirectional system 42
3-6. Unit of dimensioning 43
3-7. General rules for dimensioning . 43
3-8. Practical hints on dimensioning 43
Exercises III 48

CHAPTER 4 SCALES 51-68

4-1. Introduction 51
4-2. Scales 51
(1) Engineer's, (2) Graphical scale 52
(3) Representative fraction ... 52
4-3. Scales on drawings 52
4-4. Types of scales 52
(1) Plain scales 52
(2) Diagonal scales 55
(3) Comparative scales 59
(4) Vernier scales 61
(5) Scale of chords 65
Exercises IV 66

CHAPTER 5 GEOMETRICAL CONSTRUCTION 69-100

5-0. Introduction 69
5-1. Bisecting a line 69
5-2. To draw perpendiculars 70
5-3. To draw parallel lines 72
5-4. To divide a line 73
5-5. To divide a circle 74
5-6. To bisect an angle 75
5-7. To trisect an angle 75
5-8. To find the centre of an arc .. 76
5-9. To construct an ogee or reverse curve 79
5-10. To construct equilateral triangles 80
5-11. To construct squares 81
5-12. To construct regular polygons . 82
5-13. Special methods of drawing regular polygons 84
5-14. Regular polygons inscribed in circles 86
5-15. To draw regular figures using T-square and set-squares 88
5-16. To draw tangents 89
5-17. Lengths of arcs 91
5-18. Circles and lines in contact ... 92
5-19. Inscribed circles 94
Exercises V 98

CHAPTER 6 CURVES USED IN ENGINEERING PRACTICE 101-150

6-0. Introduction 101
6-1. Conic sections 101
6-1-1. Ellipse 102
6-1-2. Parabola 109
6-1-3. Hyperbola 112
6-1-4. Tangents and normals to conics 115
6-2. Cycloidal curves 116
6-2-1. Cycloid 116
6-2-2. Trochoid 118
6-2-3. Epicycloid and hypocycloid ... 120
6-2-4. Epitrochoid 122
6-2-5. Hypotrochoid 123
6-3. Involute 124
6-4. Evolutes 130
6-5. Spirals 133
6-5-1. Archemedian spiral 134
6-5-2. Logarithmic or equiangular spiral 136
6-6. Helix 138
6-6-1. A method of drawing a helical curve 138
6-6-2. Helical springs 139
6-6-3. Screw threads 141
6-6-4. Helix upon a cone 142
6-7. Cam 143
Exercises VI 144

CHAPTER 7 LOCI OF POINTS 151-168

7-0. Introduction 151
7-1. Loci of points 151
7-2. Simple mechanisms 153
7-2-1. The slider crank mechanism ... 153
(1) Simple slider crank mechanism 154
(2) Offset slider crank mechanism 154
7-2-2. A four-bar mechanism 156
Exercises VII 166

CHAPTER 8 ORTHOGRAPHIC PROJECTION 169-188

8-0. Introduction 169
8-1. Principle of projection 169
8-2. Methods of projection 169
8-3. Orthographic projection 169
8-4. Planes of projection 171
8-5. Four quadrants 171
8-6. First-angle projection 171
8-7. Third-angle projection 172
8-8. Reference line 173
8-9. B.I.S. code of practice 177
8-10. Typical Problems 177
Exercises VIII 183

CHAPTER 9 PROJECTIONS OF POINTS 189-194

9-0. Introduction 189
9-1. A point is situated in the first quadrant 189
9-2. A point is situated in the second quadrant 190
9-3. A point is situated in the third quadrant 190
9-4. A point is situated in the fourth quadrant 191
9-5. General conclusions 191
Exercises IX 193

CHAPTER 10 PROJECTIONS OF STRAIGHT LINES 195-240

10-0. Introduction 195
10-1. Line parallel to one or both the planes 195
10-2. Line contained by one or both the planes 196
10-3. Line perpendicular to one of the planes 197
10-4. Line inclined to one plane and parallel to the other 198
Exercises X(a) 200
10-5. Line inclined to both the planes 201
10-6. Projections of lines inclined to both the planes ... 203
10-7. Line contained by a plane perpendicular to both the reference planes 205
10-8. True length of a straight line and its inclinations with the reference planes 206
10-9. Traces of a line 209
10-10. Methods of determining traces of a line 211
10-11. Traces of a line, the projections of which are perpendicular to xy 212
10-12. Positions of traces of a line ... 212
10-13. Additional illustrative problems 214
Exercises X(b) 237

CHAPTER 11 PROJECTIONS ON AUXILIARY PLANES 241-254

11-0. Introduction 241
11-1. Types of auxiliary planes and views 241
11-2. Projection of a point on an auxiliary plane 242
11-3. Projections of lines and planes by the use of auxiliary planes . 246
11-4. To determine true length of a line 247
11-5. To obtain point-view of a line and edge-view of a plane 248
11-6. To determine true shape of a plane figure 250
Exercises XI 253

CHAPTER 12 PROJECTIONS OF PLANES 255-270

12-0. Introduction 255
12-1. Types of planes 255
(1) Perpendicular planes 255
(2) Oblique planes 257
12-2. Traces of planes 257
12-3. General conclusions
(1) Traces 258
(2) Projections 258
12-4. Projections of planes parallel to one of the reference planes 259
(1) When the plane is parallel to the H.P. 259
(2) When the plane is parallel to the V.P. 259
12-5. Projections of planes inclined to one reference plane and perpendicular to the other 260
(1) Plane, inclined to the H.P. and perpendicular to the V.P. 260
(2) Plane, inclined to the V.P. & perpendicular to the H.P. 261
12-6. Projections of oblique planes . 261
Exercises XII 269

CHAPTER 13 PROJECTIONS OF SOLIDS 271-312

13-0. Introduction 271
13-1. Types of solids 271
(1) Polyhedra 271
(2) Solids of revolution 273
13-2. Projections of solids in simple positions 274
Exercises XIII(i) 279

13-3. Projections of solids with axes inclined to one of the reference planes and parallel to the other 279
13-3-1. Axis inclined to the V.P. and parallel to the H.P. 280
13-3-2. Axis inclined to the H.P. and parallel to the V.P. 282
13-4. Projections of solids with axes inclined to both the H.P. and the V.P. 286
13-5. Projections of spheres 300
(1) Spheres in contact with each other 302
(2) Unequal spheres 303
Exercises XIII(ii) 309

CHAPTER 14 SECTIONS OF SOLIDS 313-350

14-0. Introduction 313
(1) Section planes 313
(2) Sections 314
(3) True shape of a section . 314
14-1. Sections of prisms 314
(1) Section plane parallel to the V.P. 314
(2) Section plane parallel to the H.P. 315
(3) Section plane perpendicular to the H.P. and inclined to the V.P. 316
(4) Section plane perpendicular to the V.P. and inclined to the H.P. 317
14-2. Sections of pyramids 320
(1) Section plane parallel to the base of the pyramid 321
(2) Section plane parallel to the V.P. 321
(3) Section plane perpendicular to the V.P. and inclined to the H.P. 322
(4) Section plane perpendicular to the H.P. and inclined to the V.P. 323
14-3. Sections of cylinders 326
(1) Section plane parallel to the base 326
(2) Section plane parallel to the axis 326
(3) Section plane inclined to the base 326
14-4. Sections of cones 329
(1) Section plane parallel to the base of the cone 329
(2) Section plane passing through the apex of the cone 330
(3) Section plane inclined to the base of the cone at an angle smaller than the angle of inclination of the generators with the base 331
(4) Section plane parallel to a generator of the cone ... 333
(5) Section plane inclined to the base of the cone at an angle greater than the angle of inclination of the generators with the base 334
14-5. Sections of spheres 338
(1) Section plane parallel to the H.P. 338
(2) Section plane parallel to the V.P. 338
(3) Section plane perpendicular to the V.P. and inclined to the H.P. 338
(4) Section plane perpendicular to the H.P. and inclined to the V.P. 339
14-6. Typical Problems of Sections of Solids 340
Exercises XIV 347

CHAPTER 15 DEVELOPMENT OF SURFACES 351-380

15-0. Introduction 351
15-1. Methods of development 352
(1) Parallel-line development 352
(2) Radial-line development . 352
(3) Triangulation development 352
(4) Approximate method 352
15-2. Developments of lateral surfaces of right solids 352
15-2-1. Cube 352
15-2-2. Prisms 354
15-2-3. Cylinders 356
15-2-4. Pyramids 360
15-2-5. Cone 365
15-3. Development of transition pieces 372
15-4. Spheres 376
Exercises XV 377

CHAPTER 16 INTERSECTION OF SURFACES 381-416

16-0. Introduction 381
16-1. Line of intersection 381
16-2. Methods of determining the line of intersection between surfaces of two interpenetrating solids 382
(1) Line method 382
(2) Cutting-plane method ... 382
16-3. Intersection of two prisms ... 382
16-4. Intersection of cylinder and cylinder 390
16-5. Intersection of cylinder & prism 396
16-6. Intersection of cone & cylinder 401
16-7. Intersection of cone & prism 409
16-8. Intersection of cone and cone 411
16-9. Intersection of sphere and cylinder or prism 412
Exercises XVI 414

CHAPTER 17 ISOMETRIC PROJECTION 417-464

17-1. Introduction 417
17-2. Isometric axes, lines & planes 418
17-3. Isometric scale 418
17-4. Isometric drawing or isometric view 420
17-5. Isometric graph 420
17-6. ILLustrative problems 421
17-6-1. Isometric drawing of planes or plane figures 421
17-6-2. Isometric drawing of prisms and pyramids 425
17-6-3. Isometric drawing of cylinders 429
17-6-4. Isometric drawing of cones .. 429
17-6-5. Isometric drawing of sphere . 430
17-7. Typical problems of isometric drawing 431
Exercises XVII 445
Solutions to Exercises XVii ... 454

CHAPTER 18 OBLIQUE PROJECTION 465-476

18-1. Introduction 465
18-2. Principle of the oblique projection 465
18-3. The oblique projection and the isometric projection 466
18-4. Receding lines & receding angles 467
18-5. Types of the oblique projection 467
18-6. Rules for the choice of position of an object 468
18-7. Steps for drawing the oblique projection 469
18-8. Oblique drawing of pyramid . 470
18-9. Oblique drawing of circle ... 470
(1) Offset method 470
(2) Four centre approximate method 471
18-10. Oblique drawing of cylinder . 471
18-11. Oblique drawing of prism ... 472
18-12. Typical problems of oblique projection 474
Exercises XVIII 475

CHAPTER 19 PERSPECTIVE PROJECTION 477-510

19-1. Introduction 477
19-2. Principle of perspective projection 477
19-3. Definitions of perspective elements 477
(1) Ground plane 478
(2) Station point 478
(3) Picture plane 478
(4) Horizontal plane 478
(5) Auxiliiary ground plane .. 478
(6) Ground line (7) Horizon line 478
(8) Perpendicular axis 478
(9) Centre of vision 478
(10) Central plane 478
19-4. Station point 479
19-5. Angle of vision 479
19-6. Picture plane 480
19-7. Methods of drawing perspective view 480
19-7-1. Visual-ray method 481
19-7-2. Vanishing-point method 485
19-8. Types of perspective 486
(1) Parallel perspective or one point perspective 486
(2) Angular perspective or two point perpective 487
(3) Oblique perspective or three point perspective .. 488
19-9. Distance points 489
19-10. Measuring line or line of heights 491
19-11. Perspectives of circles & solids 492
19-12. Typical problems of perspective projection 494
(1) Visual-ray method – by means of the top view and the front view 494
(2) Visual-ray method – by means of the top view and the side view 494
(3) Vanishing-point method . 494
Exercises XIX 509

CHAPTER 20 ORTHOGRAPHIC READING AND CONVERSION OF VIEWS 511-538

20-1. Introduction 511
20-2. Reading of orthographic views (Blue-print reading) 511
20-3. Missing lines and missing views 512
20-4. Identification of planes 512
20-5. Conversion of pictorial views into orthographic views 517
20-6. Orthographic projection 517
20-7. Procedure for preparing a scale-drawing 522
20-8. Illustrative problems 523
Exercises XX 526

CHAPTER 21 CENTRES OF GRAVITY AND MOMENTS OF INERTIA OF AREAS 539-554

21-0. Introduction 539
21-1. Centre of gravity 539
21-1-1. Centres of gravity of symmetrical areas 539
21-1-2. Centres of gravity of unsymmetrical areas 540
21-1-3. ILLustrative problems on centre of gravity 541
21-2. Moments of inertia of areas . 547
(1) Definition 547
(2) Unit 547
(3) Graphical method 548
21-3. Illustrative problems on moments of inertia 548
Exercises XXI 553

CHAPTER 22 NOMOGRAPHY 555-572

22-0. Introduction 555
22-1. Types of nomographs 555
22-2. Definitions of various terms . 556
22-3. Principle of construction of nomographs of three variables 557
22-4. Method of constructing parallel scale nomographs 559
22-5. Layout of nomographs 563
22-6. Z-type nomographs 568
Exercises XXII 571

CHAPTER 23 SCREW THREADS 573-584

23-0. Introduction 573
23-1. Definitions 573
(1) Crest, (2) Root, (3) Flank 573
(4) Angle, (5) Depth 573
(6) Nominal diameter 573
(7) Outside or major diameter 573
(8) Core or minor diameter . 573
(9) Effective diameter 574
(10) Pitch, (11) Lead, (12) Slope 574
23-2. Forms of screw threads 574
23-2-1. Triangular or V threads 575
(1) Unified thread 575
(2) Metric thread 576
(3) Whitworth thread 576
(4) British Standard Fine and British Standard Pipe threads 576
(5) Sellers thread 577
(6) British Association thread 578
23-2-2. Square thread 578
(1) Acme thread 578
(2) Knuckle thread 578
(3) Buttress thread 578
23-3. Conventional representation of threads SP: 46-2003 579
23-4. Multiple-start threads 581
23-5. Right-hand & left-hand threads 582
Exercises XXIII 583

CHAPTER 24 SCREWED FASTENINGS 585-606

24-0. Introduction 585
24-1. Types of nuts 585
24-1-1. Hexagonal nut 586
24-1-2. Square nut 588
24-2. Types of nuts for special purpose 589
(1) Flanged nut 589
(2) Cap nut, (3) Dome nut . 589
(4) Cylindrical or capstan nut 589
(5) Ring nut, (6) Wing nut . 590
24-3. Washers 590
24-4. Bolts 590
24-5. Forms of bolts 590
(1) Hexagonal-headed bolt . 590
(2) Square-headed bolt 592
(3) Cylindrical or cheese-headed bolt 593
(4) Cup-headed or round-headed bolt 593
(5) T-headed bolt 594
(6) Countersunk-headed bolt 594

(7) Hook bolt 594
(8) Headless tapered bolt .. 594
(9) Eye-bolt 595
(10) Lifting eye-bolt 595
(11) Tap-bolt or cap-screw . 595
(12) Stud-bolt or stud 595
24-6. Set-screws 597
24-7. Locking arrangements for nuts 598
(1) Lock-nut or check-nut .. 598
(2) Split-pin 599
(3) Slotted nut 599
(4) Castle nut 600
(5) Sawn nut or Wiles nut .. 600
(6) Simmond's lock-nut 600
(7) Penn, ring or grooved nut 600
(8) Stop-plate or locking-plate 601
(9) Spring-washer 601
24-8. Foundation bolts 602
(1) Eye or Hoop bolt 602
(2) Rag bolt, (3) Lewis bolt . 602
(4) Cotter bolt 603
(5) Curved or bent bolt 603
(6) Squar-headed bolt 604
24-9. Spanner 604
24-10. Longitudinal or bar stay 604
24-11. Conventional symbols for nuts and bolts 605
Exercises XXIV 605

CHAPTER 25 RIVETED JOINTS AND WELDED JOINTS 607-620

25-1. Introduction 607
25-2. Riveting 607
25-2-1. Caulking and fullering 608
25-3. Forms and proportions of rivet-heads 608
25-4. Failure of riveted joints 609
25-5. Dimensions of a riveted joint 609
25-6. Types of riveted joints 610
25-6-1. Lap joint 610
25-6-2. Butt joint 611
25-7. Rolled-steel sections 613
25-7-1. Connection of plates at right angles 614
25-7-2. Gusset stay 614
25-8. Welded joints 615
25-8-1. Welding 615
25-8-2. Types of welding process 615
25-8-3. Types of welded and welds joints 616
(1) Types of welded joints .. 616
(2) Types of welds 616
25-8-4. Representation of welded joints 617
Exercises XXV 619

CHAPTER 26 COMPUTER AIDED DRAFTING (CADr) 621-702

26-1. Introduction 621
26-2. Computer Aided Drafting 621
26-3. Computer 622
26-3-1. Processor (CPU) 623
26-3-2. Display 623
26-3-3. INPUT Devices 624
26-3-4. Graphic Output Devices 625
26-4. CAD Software 625
26-5. AutoCAD 626
26-5-1. Hardware required for AutoCAD 2009/2010 627
26-5-2. Classic screen layout of AutoCAD 2010 627
26-5-3. Function keys 628
26-5-4. Drawing Entities 628
26-5-5. Drafting Aids 630
26-5-6. Editing of a Drawing 632
26-6. Symbol Library 634
26-7. Two dimensional drawings ... 634
26-8. Isometric drawings 659
26-9. 3d Geometrical Modeling ... 665
26-9-1. 3d Wireframe Modelling 666
26-9-2. 3d Surface Modelling 669
26-9-3. 3d Solid Modelling 680
26-9-4. Commands To Generate Profile Based 3d Solids 682
26-10. Three Dimensional Drawings . 686
26-11. Perspective View In AutoCAD 700
Exercises XXVI 701

INDEX 703-708
