

CONTENTS

Preface

1 Mathematical Preliminaries

1.1	<i>Infinite Series</i>	1
1.2	<i>Series of Functions</i>	21
1.3	<i>Binomial Theorem</i>	33
1.4	<i>Mathematical Induction</i>	40
1.5	<i>Operations on Series Expansions of Functions</i>	41
1.6	<i>Some Important Series</i>	45
1.7	<i>Vectors</i>	46
1.8	<i>Complex Numbers and Functions</i>	53
1.9	<i>Derivatives and Extrema</i>	62
1.10	<i>Evaluation of Integrals</i>	65
1.11	<i>Dirac Delta Function</i>	75
	<i>Additional Readings</i>	82

2 Determinants and Matrices

2.1	<i>Determinants</i>	83
2.2	<i>Matrices</i>	95
	<i>Additional Readings</i>	121

3 Vector Analysis

3.1	<i>Review of Basic Properties</i>	123
3.2	<i>Vectors in 3-D Space</i>	124
3.3	<i>Coordinate Transformations</i>	126
	<i>Additional Readings</i>	133

3.4	<i>Rotations in \mathbb{R}^3</i>	139
3.5	<i>Differential Vector Operators</i>	143
3.6	<i>Differential Vector Operators: Further Properties</i>	153
3.7	<i>Vector Integration</i>	159
3.8	<i>Integral Theorems</i>	164
3.9	<i>Potential Theory</i>	170
3.10	<i>Curvilinear Coordinates</i>	182
	<i>Additional Readings</i>	203
4	Tensors and Differential Forms	205
4.1	<i>Tensor Analysis</i>	205
4.2	<i>Pseudotensors, Dual Tensors</i>	215
4.3	<i>Tensors in General Coordinates</i>	218
4.4	<i>Jacobians</i>	227
4.5	<i>Differential Forms</i>	232
4.6	<i>Differentiating Forms</i>	238
4.7	<i>Integrating Forms</i>	243
	<i>Additional Readings</i>	249
5	Vector Spaces	251
5.1	<i>Vectors in Function Spaces</i>	251
5.2	<i>Gram-Schmidt Orthogonalization</i>	269
5.3	<i>Operators</i>	275
5.4	<i>Self-Adjoint Operators</i>	283
5.5	<i>Unitary Operators</i>	287
5.6	<i>Transformations of Operators</i>	292
5.7	<i>Invariants</i>	294
5.8	<i>Summary—Vector Space Notation</i>	296
	<i>Additional Readings</i>	297
6	Eigenvalue Problems	299
6.1	<i>Eigenvalue Equations</i>	299
6.2	<i>Matrix Eigenvalue Problems</i>	301
6.3	<i>Hermitian Eigenvalue Problems</i>	310
6.4	<i>Hermitian Matrix Diagonalization</i>	311
6.5	<i>Normal Matrices</i>	319
	<i>Additional Readings</i>	328
7	Ordinary Differential Equations	329
7.1	<i>Introduction</i>	329
7.2	<i>First-Order Equations</i>	331
7.3	<i>ODEs with Constant Coefficients</i>	342
7.4	<i>Second-Order Linear ODEs</i>	343
7.5	<i>Series Solutions—Frobenius' Method</i>	346
7.6	<i>Other Solutions</i>	358

7.7	<i>Inhomogeneous Linear ODEs</i>	375
7.8	<i>Nonlinear Differential Equations</i>	377
	<i>Additional Readings</i>	380
8	Sturm-Liouville Theory	381
8.1	<i>Introduction</i>	381
8.2	<i>Hermitian Operators</i>	384
8.3	<i>ODE Eigenvalue Problems</i>	389
8.4	<i>Variation Method</i>	395
8.5	<i>Summary, Eigenvalue Problems</i>	398
	<i>Additional Readings</i>	399
9	Partial Differential Equations	401
9.1	<i>Introduction</i>	401
9.2	<i>First-Order Equations</i>	403
9.3	<i>Second-Order Equations</i>	409
9.4	<i>Separation of Variables</i>	414
9.5	<i>Laplace and Poisson Equations</i>	433
9.6	<i>Wave Equation</i>	435
9.7	<i>Heat-Flow, or Diffusion PDE</i>	437
9.8	<i>Summary</i>	444
	<i>Additional Readings</i>	445
10	Green's Functions	447
10.1	<i>One-Dimensional Problems</i>	448
10.2	<i>Problems in Two and Three Dimensions</i>	459
	<i>Additional Readings</i>	467
11	Complex Variable Theory	469
11.1	<i>Complex Variables and Functions</i>	470
11.2	<i>Cauchy-Riemann Conditions</i>	471
11.3	<i>Cauchy's Integral Theorem</i>	477
11.4	<i>Cauchy's Integral Formula</i>	486
11.5	<i>Laurent Expansion</i>	492
11.6	<i>Singularities</i>	497
11.7	<i>Calculus of Residues</i>	509
11.8	<i>Evaluation of Definite Integrals</i>	522
11.9	<i>Evaluation of Sums</i>	544
11.10	<i>Miscellaneous Topics</i>	547
	<i>Additional Readings</i>	550
12	Further Topics in Analysis	551
12.1	<i>Orthogonal Polynomials</i>	551
12.2	<i>Bernoulli Numbers</i>	560
12.3	<i>Euler-Maclaurin Integration Formula</i>	567

	12.4	<i>Dirichlet Series</i>	571
	12.5	<i>Infinite Products</i>	574
	12.6	<i>Asymptotic Series</i>	577
	12.7	<i>Method of Steepest Descents</i>	585
	12.8	<i>Dispersion Relations</i>	591
		<i>Additional Readings</i>	598
13	Gamma Function		599
	13.1	<i>Definitions, Properties</i>	599
	13.2	<i>Digamma and Polygamma Functions</i>	610
	13.3	<i>The Beta Function</i>	617
	13.4	<i>Stirling's Series</i>	622
	13.5	<i>Riemann Zeta Function</i>	626
	13.6	<i>Other Related Functions</i>	633
		<i>Additional Readings</i>	641
14	Bessel Functions		643
	14.1	<i>Bessel Functions of the First Kind, $J_\nu(x)$</i>	643
	14.2	<i>Orthogonality</i>	661
	14.3	<i>Neumann Functions, Bessel Functions of the Second Kind</i>	667
	14.4	<i>Hankel Functions</i>	674
	14.5	<i>Modified Bessel Functions, $I_\nu(x)$ and $K_\nu(x)$</i>	680
	14.6	<i>Asymptotic Expansions</i>	688
	14.7	<i>Spherical Bessel Functions</i>	698
		<i>Additional Readings</i>	713
15	Legendre Functions		715
	15.1	<i>Legendre Polynomials</i>	716
	15.2	<i>Orthogonality</i>	724
	15.3	<i>Physical Interpretation of Generating Function</i>	736
	15.4	<i>Associated Legendre Equation</i>	741
	15.5	<i>Spherical Harmonics</i>	756
	15.6	<i>Legendre Functions of the Second Kind</i>	766
		<i>Additional Readings</i>	771
16	Angular Momentum		773
	16.1	<i>Angular Momentum Operators</i>	774
	16.2	<i>Angular Momentum Coupling</i>	784
	16.3	<i>Spherical Tensors</i>	796
	16.4	<i>Vector Spherical Harmonics</i>	809
		<i>Additional Readings</i>	814
17	Group Theory		815
	17.1	<i>Introduction to Group Theory</i>	815
	17.2	<i>Representation of Groups</i>	821
	17.3	<i>Symmetry and Physics</i>	826

17.4	<i>Discrete Groups</i>	830
17.5	<i>Direct Products</i>	837
17.6	<i>Symmetric Group</i>	840
17.7	<i>Continuous Groups</i>	845
17.8	<i>Lorentz Group</i>	862
17.9	<i>Lorentz Covariance of Maxwell's Equations</i>	866
17.10	<i>Space Groups</i>	869
	<i>Additional Readings</i>	870
18	More Special Functions	871
18.1	<i>Hermite Functions</i>	871
18.2	<i>Applications of Hermite Functions</i>	878
18.3	<i>Laguerre Functions</i>	889
18.4	<i>Chebyshev Polynomials</i>	899
18.5	<i>Hypergeometric Functions</i>	911
18.6	<i>Confluent Hypergeometric Functions</i>	917
18.7	<i>Dilogarithm</i>	923
18.8	<i>Elliptic Integrals</i>	927
	<i>Additional Readings</i>	932
19	Fourier Series	935
19.1	<i>General Properties</i>	935
19.2	<i>Applications of Fourier Series</i>	949
19.3	<i>Gibbs Phenomenon</i>	957
	<i>Additional Readings</i>	962
20	Integral Transforms	963
20.1	<i>Introduction</i>	963
20.2	<i>Fourier Transform</i>	966
20.3	<i>Properties of Fourier Transforms</i>	980
20.4	<i>Fourier Convolution Theorem</i>	985
20.5	<i>Signal-Processing Applications</i>	997
20.6	<i>Discrete Fourier Transform</i>	1002
20.7	<i>Laplace Transforms</i>	1008
20.8	<i>Properties of Laplace Transforms</i>	1016
20.9	<i>Laplace Convolution Theorem</i>	1034
20.10	<i>Inverse Laplace Transform</i>	1038
	<i>Additional Readings</i>	1045
21	Integral Equations	1047
21.1	<i>Introduction</i>	1047
21.2	<i>Some Special Methods</i>	1053
21.3	<i>Neumann Series</i>	1064
21.4	<i>Hilbert-Schmidt Theory</i>	1069
	<i>Additional Readings</i>	1079

830	22 Calculus of Variations	17.4 Discrete Groups	1081
837	22.1 Euler Equation	17.5 Direct Products	1081
840	22.2 More General Variations	17.6 Symmetric Groups	1096
843	22.3 Constrained Minima/Maxima	17.7 Commutator Groups	1107
843	22.4 Variation with Constraints	17.8 Lie Algebras	1111
846	Additional Readings	17.9 Lie Algebras of Classical Groups	1124
849		17.10 Simple Groups	
870	23 Probability and Statistics	Additional Readings	1125
	23.1 Probability: Definitions, Simple Properties		1126
871	23.2 Random Variables	18.1 Matrix Groups	1134
871	23.3 Binomial Distribution	18.2 Matrix Groups	1148
878	23.4 Poisson Distribution	18.3 Matrix Groups	1151
882	23.5 Gauss' Normal Distribution	18.4 Matrix Groups	1155
889	23.6 Transformations of Random Variables	18.5 Matrix Groups	1159
911	23.7 Statistics	18.6 Matrix Groups	1165
917	Additional Readings	18.7 Matrix Groups	1179
923		18.8 Matrix Groups	
927	Index	18.9 Matrix Groups	1181
932		18.10 Matrix Groups	
938		19.1 Fourier Series	
938		19.2 General Properties	
949		19.3 Applications of Fourier Series	
957		19.4 Group Representation	
965		Additional Readings	
963	15	20.1 Integral Transforms	917
963	1.1 Legendre Polynomials	20.2 Introduction	917
966	2.1 Chebyshev Polynomials	20.3 Fourier Transforms	927
970	3.1 Hermite Polynomials	20.4 Properties of Fourier Transforms	927
982	4.1 Laguerre Polynomials	20.5 Fourier Convolution Theorem	947
987	5.1 Associated Legendre Polynomials	20.6 Signal Processing Applications	957
1002	6.1 Gegenbauer Polynomials	20.6 Discrete Fourier Transforms	957
1008		20.7 Laplace Transforms	967
1010		20.8 Properties of Laplace Transforms	977
1014	16	20.9 Laplace Convolution Theorem	977
1038	1.1 Bessel Functions	20.10 Inverse Laplace Transforms	987
1042	2.1 Modified Bessel Functions	Additional Readings	987
1047	3.1 Spherical Bessel Functions		987
1047		21. Integral Equations	918
1053		21.1 Introduction	
1054		21.2 Some Special Methods	918
1059		21.3 Neumann Series	918
1069		21.4 Hilbert-Schmidt Theory	928
1070		Additional Readings	937
