

1. Industry 4.0 applied to food
2. Pasteurization of juices with non-thermal technologies
3. High-Pressure Processing; Principle, Applications, Impact and Future Prospective
4. Cold plasma
5. Pulsed electric field
6. Ultraviolet light assisted titanium dioxide photocatalysis for food safety
7. Bioplastic for sustainable food packaging
8. Intelligent packaging
9. Active packaging
10. Food digestion engineering
