- 1 Dynamical Analysis in Modulated Logistic Maps
  - 1.1 Introduction
  - 1.2 Preliminaries
  - 1.3 Modulated Logistic Maps
  - 1.4 Dynamical Analysis in  $\mu x^p(1-x)^q$  for  $p = 2$  and  $q = 1$ 
    - 1.4.1 Period-Doubling Bifurcation Analysis for the Map  $M_{2,1}(\mu, x)$
  - 1.5 Dynamical Analysis in  $\mu x^p(1-x)^q$  for  $p = 1$  and  $q = 2$ 
    - 1.5.1 Period-Doubling Bifurcation Analysis for the Map  $M_{1,2}(\mu, x)$
  - 1.6 Dynamical Analysis in  $\mu x^p(1-x)^q$  for  $p = 2$  and  $q = 2$ 
    - 1.6.1 Period-Doubling Bifurcation Analysis for the Map  $M_{2,2}(\mu, x)$
  - 1.7 Conclusion
  - References
- 2 A Survey on Evolutionary Clustering Algorithms and Applications
  - 2.1 Introduction
    - 2.1.1 What Are the Evolutionary Algorithms?
    - 2.1.2 Evolutionary Algorithms for Solving Optimization Problems
    - 2.1.3 Clustering Approaches and Their Categorical Division
  - 2.2 Literature Survey and Related Work
  - 2.3 Applications of Evolutionary Clustering Algorithms
    - 2.3.1 Image Segmentation Using Evolutionary Clustering Algorithms
    - 2.3.2 Medical and Healthcare Data Clustering Using Evolutionary Clustering Algorithms
    - 2.3.3 Text Document Clustering Using Evolutionary Clustering Algorithms
  - 2.4 Performance Evaluation of Evolutionary Clustering Algorithms
  - 2.5 Conclusion
  - References
- 3 Solving Linear Fractional Programming Problem Using Revised and Column Simplex Method
  - 3.1 Introduction
  - 3.2 Literature Review
  - 3.3 Methodology
    - 3.3.1 Definition and Mathematical Formulation of LP and LFP
    - 3.3.2 Revised Simplex Method for Solving LFP Problem
    - 3.3.3 Column Simplex Method for Solving LFP Problem
  - 3.4 Numerical Illustration
    - 3.4.1 Numerical Examples Based on Revised Simplex Method
    - 3.4.2 Numerical Examples of Column Simplex Method
  - 3.5 Comparison and Discussion
  - 3.6 Conclusion
  - References
- 4 The Tradeoff in Managing Overall Cost and Backorder Minimization in Two-Stage Multi Commodity Supply Chain Problem

- 4.1 Introduction
- 4.2 Literary Background
  - 4.2.1 Indices
  - 4.2.2 Parameters
  - 4.2.3 Decision Variables
- 4.3 Problem Description and Formulation
  - 4.3.1 Mathematical Formulation
- 4.4 Computational Results and Managerial Insights
- 4.5 Conclusion

- 5 An Optimization Study on Behavior of Actinide Monochalcogenides at High Pressure
  - 5.1 Introduction
  - 5.2 Brief About Optimization in Phase Transition Study
    - 5.2.1 Reconstructive Type
    - 5.2.2 Martensitic Type
    - 5.2.3 Distortive Type
    - 5.2.4 Structural Phase Transitions
    - 5.2.5 Pressure-Induced Phase Transitions
  - 5.3 Method of Calculations
  - 5.4 Results and Discussion
  - 5.5 Conclusion
  - References
- 6 The Dynamics of a Continuous Innovation Diffusion Model with Advertisements as Well as Interpersonal Communications
  - 6.1 Introduction
  - 6.2 Mathematical Model
  - 6.3 Basic Preliminaries
  - 6.4 Existence of Equilibria and Basic Influence Number
  - 6.5 Stability Analysis of Various Equilibria
    - 6.5.1 Stability of Adopter Free Equilibrium Point  $E_0$
    - 6.5.2 Stability of Interior Equilibrium Point  $E^*$
  - 6.6 Hopf-Bifurcation Analysis
  - 6.7 Sensitivity Analysis
  - 6.8 Numerical Simulations
  - 6.9 Results and Discussion
  - 6.10 Conclusion
