

Table of Contents

1. Machine Learning Driven Design and Optimization of Mobile/Wireless System. 2. Intelligent Algorithm and Techniques for Effective Wireless Communication. 3. Machine Learning Based Intelligent Protocols. 4. Intelligent Schemes with Machine Learning and Deep Learning for Congestion Control. 5. Resource Allocation and Optimization in Wireless Network Using Machine Learning and Deep Learning. 6. Data Analysis and Security Schemes. 7. Applications of Machine Learning and Deep Learning. 8. Multimedia Communication. 9. Energy Management.
