

## Table of Contents

1. 3D Printing for Hybrid Nanocomposites: Selection Criteria, Fabrication and Defect Analysis  
Garima Mittal and Shiladitya Paul
2. 3D Nanoprinting in the Aero-Industries  
Alperen Dođru, M. Batkan Kandemir, and M. Özgür Seydibeyođlu
3. Smart 3D Nano-Printing in Automobile Industry  
Lokanath Barik and Ajit Behera
4. 3D Nanoprinting in the Biomedical/Health Care Applications  
Farhan Mazahir, Swapnali Birajdar, Deepali Bhogale, Anjali Bhosale, and Awesh K. Yadav
5. 3D Printing of 2D Nanomaterials  
Muhammad Suleman, Naila Nasir, Muftooh Ur Rehman Siddiqi, Muhammad Usman, and Sundus Tariq
6. SMART Nano-Sensors via 3D Printing Technology  
S. Deepak Kumar, G. Arun Manohar, P. S. V. Ramana Rao, and A. Mandal
7. 3D Nanoprinting in the Biomedical Industries  
Vaibhavi Srivastava, Mayank Handa, and Rahul Shukla
8. 3D Printing of Nanocomposites  
Vigneshwaran Shanmugam and Rajkumar Velu
9. Nanomaterial Used in 3D Printing Technology  
Waleed Ahmed, Essam Zaneldin, Amged Al Hassan, and Ali H. Al-Marzouqi
10. 3D Printed Batteries: Architecture, Nanomaterials Processing, Properties, and Performance  
Vikas Kumar and Shiladitya Paul
11. Evaluation of Dimensional Inaccuracy in 3D-Printed Products: A Brief Overview  
Suman Chatterjee, Ajit Behera, and Jinyang Xu
12. 3D Nanoprinting in Oral Health Care Applications  
Gaetano Isola, Alessandro Polizzi, and Simona Santonocito
13. 3D Printing of Smart Materials: A Path toward Evolution of 4D Printing  
Manila Mallik
14. Performance of Smart Alloys in Manufacturing Processes during Subtractive and Additive Manufacturing: A Short Review on SMA and Metal Alloys  
Suman Chatterjee, Jinyang Xu, T. V. Huynh, Kumar Abhishek, Soni Kumari, and Ajit Behera
15. Manufacturing of 3D Print Biocompatible Shape Memory Alloys  
Raj Manik and Ajit Behera
16. Fused Deposition Modeling (FDM) and Nano-Fillers Impact on Shape Memory Properties of 3D-Printed Thermoplastic Polyurethane (TPU) Filament  
Jigar Patdiya and Balasubramanian Kandasubramanian
