

Chapter No. Chapter Title Authors

- 1 VLSI and Hardware Implementation Using Machine Learning Methods: A Systematic Literature Review Kusum Lata, Sandeep Saini, G. R. Sinha
- 2 Machine Learning for Testing of VLSI Circuit Abhishek Choubey, Shruti Bhargava Choubey
- 3 Online Checkers to Detect Hardware Trojans in AES Hardware Accelerators Sree Ranjani Rajendran, Rajat Subhra Chakraborty
- 4 Machine Learning Methods for Hardware Security Soma Saha, Bodhisatwa Mazumdar
- 5 Application Driven Fault Identification in NoC Designs Ankur Gogoi and Bibhas Ghoshal
- 6 Online Test Derived from Binary Neural Network for Critical Autonomous Automotive Hardware Dr. Philemon Daniel
- 7 Applications of Machine Learning in VLSI Design Sneh Saurabh, Pranav Jain, Madhvi Agarwal, and OVS Shashank Ram
- 8 An Overview of High-Performance Computing Techniques Applied to Image Processing Giulliano Paes Carnielli, Rangel Arthur, Ana Carolina Borges Monteiro, Reinaldo Padilha França, and Yuzo Iano
- 9 Machine Learning Algorithms for Semiconductor Device Modeling Yogendra Gupta, Niketa Sharma, Ashish Sharma, Harish Sharma
- 10 Securing IoT-Based Microservices Using Artificial Intelligence Sushant Kumar and Saurabh Mukherjee
- 11 Applications of the Approximate Computing on ML Architecture Kattakola Naresh and Shubhankar Majumdar
- 12 Hardware Realization of Reinforcement Learning Algorithms for Edge Devices Shaik Mohammed Waseem and Subir Kumar Roy
- 13 Deep Learning Techniques for Side-Channel Analysis Varsha Satheesh Kumar, S. Dillibabu Shanmugam, and Dr. N. Sarat Chandra Babu
- 14 Machine Learning in Hardware Security of IoT Nodes T Lavanya and K Rajalakshmi
- 15 Integrated Photonics for Artificial Intelligence Applications Ankur Saharia, Kamal Kishor Choure, Nitesh Mudgal, Rahul Pandey, Dinesh Bhatia, Manish Tiwari, Ghanshyam Singh
