

PART I – THEORY AND CONCEPTS

CHAPTER 1 – The Internet of Things (IoT)

- 1.1 A New Design Paradigm: The Internet of Things
- 1.2 Introduction to the IoT Framework
- 1.3 Understanding the FULL Potential of the Internet of Things
- 1.4 Challenges of Implementing effective IoT Systems
- 1.5 Effective Implementation of IoT Systems: A step-by-step Process
- 1.6 Case studies of Successful IoT Applications
- 1.7 IoT of Tomorrow: Emerging Trends of the Internet of Things

CHAPTER 2 – Foundation Topics: Concepts

- 2.1 Terminologies & Fundamentals
- 2.2 Embedded Systems: Introduction
- 2.3 Embedded Systems: Hardware Considerations
- 2.4 Embedded Systems: Software Considerations
- 2.5 Embedded Systems: Peripherals
- 2.6 Online Resources: The Journey Continues

PART II – HANDS-ON SYSTEM DEVELOPMENT

CHAPTER 3 – Foundation Topics: Programming & Coding

- 3.1 Programming Languages: C++
- 3.2 Programming Languages: Python
- 3.3 The Linux Operating System

CHAPTER 4 – Controller Boards IoT Systems (Arduino Systems)

- 4.1 The Arduino Boards
- 4.2 Arduino Peripherals
- 4.3 The Arduino Integrated Development Environment (Arduino IDE)
- 4.4 Hands-on Projects: Arduino Autonomous Systems
- 4.5 Hands-on Projects: Arduino-based IoT Systems

CHAPTER 5 – Computer Boards IoT Systems (Raspberry Pi Systems)

- 5.1 The Raspberry Pi Boards
- 5.2 The Raspberry Pi Peripherals
- 5.4 Hands-on Projects: Raspberry Pi Autonomous Systems
- 5.5 Hands-on Projects: Raspberry Pi-based IoT Systems
