

CONTENTS

1. Introduction. 2. Numerical Solutions of Linear Systems. 3. Bracketing Numerical Methods for Solving Systems of Nonlinear Equations. 4. Open Numerical Methods for Solving Systems of Nonlinear Equations. 5. Initial Value Problem Differential Equations. 6. Numerical Integration of Definite Functions. 7. Numerical Solution of Ordinary Differential Equations. 8. Simultaneous Systems of Differential Equations. 9. Boundary Value Problems Ordinary Differential Equations. Appendix A. Appendix B.
