

Introduction

Batch Separation

Optimization and Optimal Control

Summary

Numerical Methods for Integration

Error and Stability

Numerical Integration Techniques

Orthogonal Collocation Method

Summary

Batch Reactors

Classification of Reactions and Reaction Kinetics

Irreversible Reactions

Reversible Reactions

Reactions in Parallel

Reactions in Series

Autocatalytic Reactions

Biodiesel Production: A Case Study

Summary

Batch Distillation

Early Theoretical Analysis

Hierarchy of Models

Shortcut Model

Optimization and Optimal Control

Complex Systems

Computer Aided Design Software

Summary

Optimization and Optimal Control

Optimization Problems and Software

Convex and Concave Functions

Linear Programming

Nonlinear Programming

Discrete Optimization

Optimal Control

Summary

Batch Absorption

Absorption Dynamics

Summary

Batch Extraction

Solid Extraction or Leaching

Rate of Extraction

Liquid-Liquid Extraction

Summary

Batch Adsorption

Adsorption Equilibrium

Fixed Bed or Packed Bed Adsorption

Summary

Batch Chromatography

Retention Theory

Plate Model

Resolution

Summary

Batch Crystallization

Phase Diagram

Supersaturation

Crystallization Kinetics

Modeling Cooling Batch Crystallization

Modeling Evaporative Batch Crystallization

Optimal Control Problems

Summary

Batch Drying

Thermodynamics of Drying

Rate of Drying

Types of Dryers

Summary

Batch Filtration

Conventional or Dead-End Filtration

Crossflow Filtration

Types of Filtration Equipment

Summary

Batch Centrifugation

Sedimentation in a Centrifugal Field

Filtration in Centrifugal Field

Summary

Batch Scheduling and Planning

Types of Scheduling Problems

Role of Optimization in Batch Scheduling

Industrial Scheduling Problem

Summary

Batch Process Simulation

Introduction

Detailed Modeling of Single Batch Processes

Modeling of Multiproduct Batch Plants

Summary
