

# Table of Contents

Amperometric Biosensors in Food Processing, Safety, and Quality Control, *İsmail Hakkı Boyacı and Mehmet Mutlu*

Basic Principles of Optical Biosensors in Food Engineering, *Ebru Akdoğan and Mehmet Mutlu*

Mass Sensitive Biosensors: Principles and Applications in Food, *Selma Mutlu*

Biosensing for Food Safety, *María Isabel Pividori and Salvador Alegret*

Electrochemical DNA Biosensors in Food Safety, *Pınar Kara, Ozan Kılıçkaya, and Mehmet Şengün Özsöz*

Biosensors for the Assessment of Natural Toxins in Food, *Beatriz Prieto-Simón, Thierry Noguier, and Mònica Campàs*

Biosensors for Pesticides and Foodborne Pathogens, *Munna S. Thakur, Raghuraj S. Chouhan, and Aaydha C. Vinayaka*

Impedance Biosensors/Biochips for Detection of Foodborne Pathogens, *Liju Yang*

Application of Biosensors for the Quality Assurance of Dairy Products, *P. Narender Raju and K. Hanumantha Rao*

Electrochemical Biosensors as a Tool for the Determination of Phenolic Compounds and Antioxidant Capacity in Foods and Beverages, *Montserrat Cortina-Puig, Thierry Noguier, Jean-Louis Marty, and Carole Calas-Blanchard*

Neural Networks: Their Role in the Field of Sensors, *José S. Torrecilla*

Trends in Biosensing and Biosensors, *Frank Davis and Séamus P.J. Higson*
