

Table of Contents

Use of Biotechnology in the Development of Food Processes and Products

Biotechnology-Derived Enzymes for Food Applications, *Philippe Ramos, António A. Vicente, and José A. Teixeira*

Development of Probiotics and Prebiotics, *Ernesto Hernandez and Severino S. Pandiella*

Production and Food Applications of Microbial Biopolymers, *Filomena Freitas, Vitor D. Alves, Isabel Coelho, and Maria A.M. Reis*

Advanced Fermentation Processes, *Leona Paulová, Petra Patáková, and Tomáš Brányik*

Meet the Stem Cells: Production of Cultured Meat from a Stem Cell Biology Perspective, *Bas Brinkhof, Bernard A.J. Roelen, and Henk P. Haagsman*

Advanced Unit Operations in Food Biotechnology

Membrane Filtration, *Štefan Schlosser*

Chromatography, *Katarzyna Wrzosek, Łukasz Wiśniewski, Michal Gramblička, Monika Antošová, and Milan Polakovič*

Crystallization, *António Ferreira and Fernando Alberto Rocha*

Supercritical Extraction, *M. Gabriela Bernardo-Gil*

Innovative Unit Operations, *Jane Selia dos Reis Coimbra, João Paulo Martins, and Luiza Helena Meller da Silva*

Process Analytical Technology, *José A. Teixeira, António A. Vicente, Fernando Filipe Macieira da Silva, João Sérgio Azevedo Lima da Silva, and Rui Miguel da Costa Martins*

Adding Value to Food Processing By-Products—The Role of Biotechnology

Dairy, *Carla Oliveira, Lucília Domingues, Lígia Rodrigues, and José A. Teixeira*

Recovery and Biotechnological Production of High-Value-Added Products from Fruit and Vegetable Residues, *Elisa Alonso González, Ana Torrado Agrasar, María Luisa Rúa Rodríguez, Lorenzo Pastrana Castro, and Nelson Pérez Guerra*

Valorization and Integral Use of Seafood By-Products, *M.E. López-Caballero, B. Giménez, M.C. Gómez-Guillén, and P. Montero*

Coffee, *Solange I. Mussatto and José A. Teixeira*

Beer, *Solange I. Mussatto, Nuno G.T. Meneses, and José A. Teixeira*
