

## Table of Contents

Extraction and Purification of Bioactive Compounds, *M. Angela A. Meireles*

Steam Distillation Applied to the Food Industry, *M. Angela A. Meireles*

Distillation Applied to the Processing of Spirits and Aromas, *Antonio J. A. Meirelles, Eduardo A. C. Batista, Helena F. A. Scanavini, Fábio R. M. Batista, Roberta Ceriani, and Luiz F. L. Lima, Jr.*

Low-Pressure Solvent Extraction (Solid–Liquid Extraction, Microwave Assisted and Ultrasound Assisted) from Condimentary Plants, *Thais M. Takeuchi, Camila G. Pereira, Mara E. M. Braga, Mário R. Maróstica, Jr., Patrícia F. Leal, and M. Angela A. Meireles*

Liquid–Liquid Extraction Applied to the Processing of Vegetable Oil, *Eduardo A. C. Batista, Antonio J. A. Meirelles, Christianne E. C. Rodrigues, and Cintia B. Gonçalves*

Supercritical and Pressurized Fluid Extraction Applied to the food industry, *M. Angela A. Meireles*

Concentration of Bioactive Compounds by Adsorption/Desorption, *Lourdes Calvo and María José Cocero*
