

Table of Contents

Physical Chemistry of Colloidal Systems Applied to Food Engineering, *Ana Clarissa dos Santos Pires, Maria do Carmo Hespanhol da Silva, and Luis Henrique Mendes da Silva*

Bioseparation Processes, *Jane Coimbra and José Antonio Couto Teixeira*

Applications of Membrane Technologies in the Dairy Industry, *Antonio Fernandes de Carvalho and J.-L. Maubois*

Aqueous Two-Phase Systems Applied to Whey Protein Separation, *Abraham Damian Giraldo Zuniga, Jane Sélia dos Reis Coimbra, José Antonio Couto Teixeira, and Lúgia Rodrigues*

Techniques Applied to Chromatographic to Product, *Rafael da Costa Ilhéu Fontan, António Augusto Vicente, Renata Cristina Ferreira Bonomo, and Jane Sélia dos Reis Coimbra*

Crystallization of Lactose and Whey Protein, *Everson Alves Miranda, André Bernardo, Gisele Atsuko Medeiros Hirata, and Marco Giulietti*

Novel Technologies for Milk Processing, *Ricardo Nuno Pereira and António Augusto Vicente*

Active and Intelligent Packaging for Milk and Milk Products, *Nilda de Fátima Ferreira Soares*, Cleuber Antônio de Sá Silva, Paula Santiago-Silva, Paula Judith Pérez Espitia, Maria Paula Junqueira Conceição Gonçalves, Maria José Galotto Lopez, Joseph Miltz, Miguel Ângelo Cerqueira, António Augusto Vicente, José Antonio Couto Teixeira, Washington Azevedo da Silva, and Diego Alvarenga Botrel*

Microcalorimetry: A Food Science and Engineering Approach, *Ana Clarissa dos Santos Pires, Maria do Carmo Hespanhol da Silva, and Luis Henrique Mendes da Silva*

Potential Applications of Whey Proteins in the Medical Field, *Lúgia Rodrigues and José Antonio Couto Teixeira*
