

Table of contents

Contributors

Preface

Editors

I. Factors of Special Significance to Food Microbiology

1. Behavior of Microorganisms in Food: Growth, Survival, and Death

Ahmed E. Yousef and Ahmed G. Abdelhamid

2. Spores and Their Significance

Peter Setlow and Eric A. Johnson

3. Microbiological Criteria and Indicator Microorganisms

Leon G. M. Gorris and Jean-Louis Cordier

4. Stress Responses in Foodborne Bacteria

Francisco Diez-Gonzalez

II. Microbial Spoilage and Public Health Concerns

5. Milk and Dairy Products

Zhengyao Xue and Maria L. Marco

6. Meat and Poultry

Manpreet Singh and Harshavardhan Thippareddi

7. Microbiological Issues Associated with Fruits, Vegetables, Nuts, and Grains

Marilyn C. Erickson

III. Foodborne Pathogenic Bacteria

8. Epidemiology of Foodborne Illnesses

Craig W. Hedberg

9. Salmonella

April M. Lewis, Melanie C. Melendrez, and Ryan C. Fink

10. Eleven Campylobacter Species

Ihab Habib, Lieven De Zutter, and Mieke Uyttendaele

11. Shiga Toxin-Producing *Escherichia coli*

Narjol Gonzalez-Escalona, Jianghong Meng, and Michael P. Doyle

12. Shigella

Christina S. Faherty and Keith A. Lampel

13. Vibrio Species

Daniela Ceccarelli, Carmen Amaro, Jesus L. Romalde, Elisabetta Suffredini, and Luigi Vezzulli

14. Cronobacter Species

Ben D. Tall, Gopal Gopinath, Jayanthi Gangiredla, Isha R. Patel, Séamus Fanning, and Angelika Lehner

15. Aeromonas

Troy Skwor and Stanislava Kralova

16. Yersinia enterocolitica

Dike O. Ukuku and Mohammad Latiful Bari

17. Listeria

Elliot T. Ryser, Robert L. Buchanan, and Henk C. Den Bakker

18. Clostridium botulinum

Eric A. Johnson

19. Clostridium perfringens

Santos Garcia, Jorge E. Vidal, Norma Heredia, and Vijay K. Juneja

20. Bacillus cereus

Toril Lindbäck and Per Einar Granum

21. Staphylococcus aureus

Joo Youn Park and Keun Seok Seo

IV. Nonbacterial Pathogens/Toxins

22. Mycotoxins

Marta H. Taniwaki and John I. Pitt

23. Foodborne Viral Pathogens

Kristen E. Gibson, Doris H. D'souza, And Aron J. Hall

24. Helminths in Meat

Dante S. Zarlenga and H. Ray Gamble

25. Protozoan Parasites

Ynes R. Ortega

V. Preservatives and Preservation Methods

26. Novel Physical Methods for Food Preservation

Luis J. Bastarrachea and Rohan V. Tikekar

27. Chemical Preservatives and Natural Food Antimicrobials

T. Matthew Taylor, Sadhana Ravishankar, Kanika Bhargava, and Vijay K. Juneja

28. Biological Control of Food-Challenging Microorganisms

Richard Weeks and Michael Leonidas Chikindas

29. Bacteriophages for Biological Control of Foodborne Pathogens

Yilmaz Emre Gencay and Lone Brøndsted

VI. Fermentations and Beneficial Microbes

30. Starter Cultures

Jennifer Mahoney, Olivia Mcauliffe, Paul D. Cotter, and Gerald F. Fitzgerald

31. Diet, Health, and the Gut Microbiota

Cian J. Hill, Francesca De Filippis, and Ian B. Jeffery

32. Probiotics and Prebiotics

Mary Ellen Sanders, Yong Jun Goh, and Todd R. Klaenhammer

33. Fermented Foods

Michael Gänzle

VII. Current Issues and Advances in Food Microbiology

34. Antimicrobial Resistance, Gut Microbiota, and Health

Hua Wang, Yang Zhou, and Lu Zhang

35. Genomics of Foodborne Microorganisms

Caitriona M. Guinane, Calum Walsh, and Paul D. Cotter

36. Metagenomics of Meat and Poultry

Margaret D. Weinroth, Noelle R. Noyes, Paul M. Morley, and Keith E. Belk

37. Food Microbiomes: A New Paradigm for Food and Food Ecology

Andrea R. Ottesen and Padmini Ramachandran

38. Molecular Source Tracking and Molecular Subtyping

Peter Gerner-Smidt, Eija Trees, Heather Carleton, Lee Katz, Henk Den Bakker, and Xiangyu Deng

39. Predictive Microbiology and Microbial Risk Assessment

Abani K. Pradhan, Abhinav Mishra, and Hao Pang

40. Food Safety Management Systems

Kelly Stevens and Scott Hood

41. Microbiological Constraints for Use of Reclaimed and Reconditioned Water in Food Production and Processing Operations

Marilyn C. Erickson and Mussie Y. Habteselassie

42. Relevance of Food Microbiology Issues to Current Trends (2008–2018) in Food Production and Imported Foods

Marilyn C. Erickson and Michael P. Doyle

Index
