Introduction

Part I: Perimeter Security

Chapter 1: Overview of Network Security

Chapter 2: Access Control

Chapter 3: Device Security

Chapter 4: Security Features on Switches

Chapter 5: Cisco IOS Firewall

Chapter 6: Cisco Firewalls - Appliance and Module

Chapter 7: Attack Vectors and Mitigation Techniques

Part 2: Identity Security and Access Management

Chapter 8: Securing Management Access

Chapter 9: Cisco Secure ACS

Chapter 10: Multi-Factor Authentication

Chapter 11: Layer 2 Access Control

Chapter 12: Wireless LAN (WLAN) Security

Chapter 13: Network Admission Control (NAC)

Part 3: Data Privacy

Chapter 14: Cryptography

Chapter 15: IPSec VPN

Chapter 16: Dynamic Multipoint VPN (DMVPN)

Chapter 17: Group Encrypted Transport VPN (GET VPN)

Chapter 18: Secure Sockets Layer VPN (SSL VPN)

Chapter 19: MPLS VPN

Part 4: Security Monitoring

Chapter 20: Network Intrusion Prevention

Chapter 21: Host Intrusion Prevention

Chapter 22: Anomaly Detection

Chapter 23: Security Monitoring, Analysis, and Response System using CS-MARS

Part 5: Policy and Security Management

Chapter 24: Cisco Security Management Applications

Chapter 25: Business Governance / Regulatory Compliance
