

1. Evaluation of Thermal Processing in the Dairy Industry Using Milk Enzymes

Loredana Dumitrascu, Gabriela Râpeanu, and Nicoleta Stanciuc

2. Microwave Heating: Alternative Thermal Process Technology for Food Application

Deepak Kumar Verma et al.

3. Effects of Drying Technology on Physiochemical and Nutritional Quality of Fruits and Vegetables

Deepak Kumar Verma et al.

4. Disinfection of Drinking Water by Low Electric Field

Asaad Rehman Saeed Al-Hilphy, Nawfal A. Alhelfi, and Saher Sabih George

5. Removal Cholesterol from Minced Meat Using Supercritical CO₂

Asaad Rehman Saeed Al-Hilphy, Munir Abood Jasim Al-Tai, and Hassan Hadi Mehdi AlRubaiy

6. Microwave-Convective Drying of Ultrasound Osmotically Dehydrated Tomato

João Renato de Jesus Junqueira et al.

7. Ultrasound-Assisted Osmotic Dehydration in Food Processing: A Review

Vahid Mohammad pour Karizaki

8. Hydrodynamic Cavitation Technology for Food Processing and Preservation

Naveen Kumar Mahanti et al.

9. High Pressure Processing (HPP): Fundamental Concepts, Emerging Scope, and Food Application

Deepak Kumar Verma et al.

10. Induced Electric Field (IEF) as an Emerging Non-hermal Techniques for Food Processing Industries: Fundamental Concepts and Application
