

# Table of Contents

- 
- List of contributors
- Woodhead Publishing Series in Food Science, Technology and Nutrition
- Preface
- Part One: Food contact legislation: an overview
  - 1: Food migration testing for food contact materials
    - Abstract
    - 1.1 Introduction
    - 1.2 Possibilities of food migration testing
  - 2: Compliance testing for food contact materials
    - Abstract
    - 2.1 Introduction
    - 2.2 Testing in the European Union
    - 2.3 Testing in the United States
  - 3: Future trends in global food packaging regulation
    - Abstract
    - 3.1 Background
    - 3.2 Trend 1: more restrictive requirements for materials used in contact with foods consumed by sensitive populations
    - 3.3 Trend 2: more focus on novel materials and how to regulate them
    - 3.4 Trend 3: more attention to “chemicals of concern”
    - 3.5 Trend 4: more recycled food packaging
- Part Two: Food contact legislation for specific materials
  - 4: Global legislation for plastic materials in contact with food
    - Abstract
    - 4.1 Introduction
    - 4.2 Food contact jurisdictions around the world
    - 4.3 Plastic resins
    - 4.4 Special applications
    - 4.5 Future trends
    - 4.6 Further information
  - 5: Global legislation for regenerated cellulose materials in contact with food
    - Abstract
    - Acknowledgments
    - 5.1 Introduction
    - 5.2 Interactions environment-regenerated cellulose foodstuffs
    - 5.3 Food and other sanitary applications
    - 5.4 Regulatory aspects of regenerated cellulose (RC) for food contact applications
    - 5.5 Perspectives and future trends
    - Appendix: list of acronyms
  - 6: Global legislation for rubber materials in contact with food

- Abstract
- 6.1 Introduction
- 6.2 Regulatory scene in Europe
- 6.3 Regulatory requirements in the United States
- 6.4 Regulatory requirements in Canada
- 6.5 Legislation in Mercosur countries and applicability of EU and FDA regulations
- 6.6 Requirements for food contact rubber in Japan
- 6.7 Requirements for food contact rubber in China
- 6.8 Taiwan requirements for rubber
- 6.9 Further information: research studies on food contact rubber
- 7: A US regulatory perspective on multilayer food contact articles
  - Abstract
  - Acknowledgments
  - 7.1 Introduction
  - 7.2 Regulatory authority
  - 7.3 Regulatory considerations
  - 7.4 Coatings for food packaging
  - 7.5 Multilaminate materials for food packaging
  - 7.6 Functional barrier concept
  - 7.7 Migration modeling
  - 7.8 Future trends
  - 7.9 Further information
- 8: Global legislation for active and intelligent packaging materials
  - Abstract
  - 8.1 Introduction
  - 8.2 The role of packaging innovation
  - 8.3 Economic aspects of active and intelligent packaging materials and articles
  - 8.4 Regulatory aspects for active and intelligent packaging materials and articles
  - 8.5 Active and intelligent packaging materials and articles for food contact applications
  - 8.6 Examples of innovative active and intelligent packaging materials and articles
  - 8.7 A sight outside Europe
  - 8.8 Legislation in other jurisdictions
- 9: Global legislation for paper and card materials in contact with food
  - Abstract
  - 9.1 Regulation of food contact paper and paperboard in the United States
  - 9.2 Regulation of food contact paper and paperboard in South America
  - 9.3 Regulation of food contact paper and paperboard in the European Union
  - 9.4 Regulation of food contact paper and paperboard in Japan

- o Index
  - 9.5 Regulation of food contact paper and paperboard in China
  - 9.6 Future trends in food contact paper regulation
