CONTENTS

PREFACE

1. REVOLUTIONS IN FOOD SECURITY	1
2. PRINCIPLES OF FOOD PRESERVATION	5
2.1 Prevention or Delay of Autolysis	6
2.2 Prevention or Delay of Microbial Activity	7
2.2.1 Keeping Microorganisms Out	7
2.2.2 Removal of Microorganisms	8
2.2.3 Creation of Unfavourable Conditions	8
2.2.4 Destruction of Microorganisms	9
2.3 Control of Pest Activities	10
2.3.1 Insects	10
2.3.2 Rodents	11
2.3.3 Birds	12
2.4 Reduction in Physical Defects	12
2.4.1 Surface Drying	12
2.4.2 Crystallization	13
2.4.3 Other Defects	13
3. PREPARATORY OPERATIONS IN FOOD PROCESSING	15
3.1 Handling and Transportation of Raw Materials	15
3.2 Cleaning	16
3.2.1 Dry Cleaning	17
3.2.2 Wet Cleaning	18
3.3 Sorting and Grading	19
3.3.1 Weight Sorting	20
3.3.2 Size-Sorting	20
3.3.3 Shape-Sorting	20
3.3.4 Colour-Sorting	20
3.4 Peeling, Shelling, Skinning	21
3.5 Removal of Inedible Constituents	22
3.6 Size Reduction	24
3.7 Mixing	25
3.8 Filtration	26

19

3.9	Prevention of Enzymatic Browning	26
3.9.1	Blanching	27
3.9.2	Use of Chemicals	28
4.	USE OF HIGH TEMPERATURE	29
4.1	Cooking	29
4.2	Blanching	30
4.3	Pasteurization	31
4.3.1	Continuous Pasteurizers	31
4.3.2	Discontinuous Pasteurizers	32
4.4	Canning	32
4.4.1	Preparation of Raw Materials	32
4.4.2	Filling	33
4.4.3	Syruping and Brining	33
4.4.4	Lidding and Clinching	35
4.4.5	Exhausting and Vacuuming	35
4.4.6	Sealing	37
4.4.7	Heat Processing	37
4.4.8	Cooling	44
4.4.9	Labelling	46
4.4.10	Storing and Packing	46
5.	USE OF LOW TEMPERATURE	47
5.1	Equipment	48
5.2	Refrigeration Systems	49
5.3	Use of Above Freezing Temperature.	49
5.3.1	Objectives of Cooling Foods	50
5.3.2	Pre-treatment of Food for Low Temperature Storage	50
5.3.3	Cold Storage Procedure	51
5.3.4	Factors Affecting Cold Storage of Foods	52
5.4	Use of Below Freezing Temperature	55
5.4.1	Methods of Food Freezing	55
5.4.2	Effect of Freezing on Foods	58
5.4.3	Storage Life of Frozen Foods	59
5.4.4	Effect of Thawing on the Quality of Frozen Foods	60
5.4.5	Effect of Freezing on Microorganisms	61

6.	REMOVAL OF MOISTURE	63
6.1	Role of Water in Food	63
6.2	Forms of Water in Food	63
6.3	Advantages of Dried Foods	64
6.4	Sun-Drying	64
6.4.1	Equipment	65
6.4.2	Procedure	65
6.4.3	Precautions	65
6.5	Dehydration	66
6.5.1	Drying Atmosphere	66
6.5.2	Factors Affecting Evaporation of Water from Food Surface	66
6.5.3	Types of Dehydrators	67
6.6	Evaporation and Concentration	73
6.7	Freeze-Drying	74
6.8	Dehydro-Freezing	74
6.9	Intermediate Moisture Foods Technology	75
7.	USE OF CHEMICAL ADDITIVES	77
7.1	Definitions	77
7.1.1	Contaminant	77
7.1.2	Food Adulterant	78
7.1.3	Chemical Additive	79
7.2	Functions of Food Additives	79
7.3	Chemical Additives as Non-Preservatives	79
7.3.1	Improve Colour	79
7.3.2	Improve Flavour	81
7.3.3	Improve Taste	81
7.3.4	Improve Nutrition	81
7.3.5	Improve Functional Properties of Foods	82
7.4	Chemical Additives as Preservatives	83
7.4.1	Anti-ripening Agents	83
7.4.2	Sprout Inhibitors	83
7.4.3	Antioxidants	85
7.4.4	Antimicrobial Agents	86
7.5	Food Laws	86

8. USE OF FERMENTATIONS	89
8.1 Fermented Foods	89
8.2 Objects of Fermentation	90
8.3 Types of Fermentations	91
8.3.1 Alcoholic Fermentation	91
8.3.2 Acetic Fermentation	94
8.3.3 Lactic Fermentation	95
8.4 Changes in Foods as a Result of Fermentation	96
9. USE OF IRRADIATIONS	99
9.1 Units of Measurement	99
9.2 Characteristics of Electromagnetic Waves	100
9.3 Sources of Electromagnetic Radiations	100
9.4 Use of Ultraviolet Radiations	101
9.5 Use of Ionizing Radiations	101
9.6 Commercial Applications of Irradiations	102
9.6.1 Sprout Inhibition	103
9.6.2 Insect Disinfestation	103
9.6.3 Radiation Pasteurisation	104
9.6.4 Radiation Sterilization – Radappertization	104
9.6.5 Delayed Ripening	105
9.6.6 Other Applications	105
9.7 Effect of Irradiation on Foods	106
9.7.1 Effect on Water	106
9.7.2 Effect on Carbohydrates	107
9.7.3 Effect on Proteins	107
9.7.4 Effect on Lipids	107
9.7.5 Effect on Vitamins	107
10. FOOD PACKAGING	109
10.1 Characteristics of a Package	110
10.2 Packaging Materials	111
10.3 Rigid and Flexible Metals	111
10.3.1 Rigid Metal Containers – Tin can	111
10.3.2 Flexible Metal Containers	114

10.4 Glass	115
10.4.1 Manufacture of Glass Container	115
10.4.2 Glass Container Seal	116
10.4.3 Glass Fracture	116
10.4.4 Returnable and Non-returnable Bottles	117
10.5 Flexible and Rigid Cellulosics and Plastics	117
10.6 FLEXIBLE and Rigid Paper Products	119
10.7 Laminates and Multilayer Materials	119
10.7.1 Retort Pouch	121
10.8 Protective Packaging in Tropical Environments	121
10.9 Food Labelling	122
SOURCES AND FURTHER READINGS	125
JOURNALS AND PERIODICALS	126
APPENDIX—I	127
OUTLINE OF THE U GC APPROVED COURSE (Revised 2001) - FOOD PROCESSING AND PRESERVATION 3(2-2)	
APPENDIX —II	128
PUNJAB BOARD OF TECHNICAL EDUCATION APPROVED COURSE FOR DAE FOOD TECHNOLOGY- FT 113 INTRODUCTION TO FOOD SCIENCE & TECHNOLOGY 2(3-3)	
INDEX	129

**KNOWLEDGE IS OF TWO KINDS:
WE KNOW A SUBJECT OURSELVES
OR WE KNOW WHERE WE CAN FIND
INFORMATION UPON IT**
